

SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K
ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

FOR THE FISCAL YEAR ENDED OCTOBER 31, 2002 COMMISSION FILE NO. 1-8597

THE COOPER COMPANIES, INC.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction
of incorporation)

94-2657368
(I.R.S. Employer
Identification No.)

6140 Stoneridge Mall Road, Suite 590
Pleasanton, California
(Address of principal executive offices)

94588
(Zip Code)

925-460-3600
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$.10 Par Value, and associated Rights	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Act). Yes No

Aggregate market value of the voting stock held by non-affiliates of the registrant as of December 31, 2002: Common Stock, \$.10 Par Value - \$767,320,541.

Number of shares outstanding of the registrant's common stock, as of December 31, 2002: 30,906,248.

Portions of the Annual Report to Stockholders for the fiscal year ended October 31, 2002	Parts I and II
Portions of the Proxy Statement for the Annual Meeting of Stockholders scheduled to be held March 25, 2003	Part III

PART I

Item 1. Business.

Introduction

The Cooper Companies, Inc. (the "Company," "Cooper" or "we" and similar pronouns), through its principal subsidiaries, develops, manufactures and markets healthcare products.

CooperVision ("CVI") develops, manufactures and markets a broad range of contact lenses for the worldwide vision care market. It specializes in toric lenses that correct astigmatism, cosmetic lenses that change the appearance of the color of the eye, and other lenses, primarily high growth, specialty and value added market segments around the world. Its leading products are disposable and planned replacement toric and spherical lenses. CooperSurgical ("CSI") markets medical devices, diagnostic products, surgical instruments and accessories used primarily by gynecologists and obstetricians.

Forward-Looking Statements

Some of the information included in this Form 10-K contains "forward-looking statements" as defined by the Private Securities Litigation Reform Act of 1995. The forward-looking statements include certain statements pertaining to our capital resources, performance and results of operations. In addition, all statements regarding anticipated growth in our revenue, anticipated market conditions and results of operations are forward-looking statements. To identify forward-looking statements look for words like "believes," "expects," "may," "will," "should," "seeks," "intends," "plans," "estimates" or "anticipates" and similar words or phrases. Discussions of strategy, plans or intentions often contain forward-looking statements. These, and all forward-looking statements, necessarily depend on assumptions, data or methods that may be incorrect or imprecise.

Events, among others, that could cause actual results and future actions to differ materially from those described by or contemplated in forward-looking statements include major changes in business conditions, a major disruption in the operations of our manufacturing facilities, new competitors or technologies, significant delays in new product introductions, the impact of an undetected virus on our computer systems, acquisition integration delays or costs, increases in interest rates, foreign currency exchange exposure, investments in research and development and other start-up projects, dilution to earnings per share from acquisitions or issuing stock, regulatory issues, changes in tax laws, changes in geographical profit mix effecting tax rates, significant environmental cleanup costs above those already accrued, litigation costs including any related settlements or judgments, cost of business divestitures, the requirement to provide for a significant liability or to write off a significant asset, changes in accounting principles or estimates, and other factors described in our Securities and Exchange Commission filings, including the "Business" section in this 10-K for the year ended October 31, 2002 and the related portions of the Company's 2002 Annual Report to Stockholders ("2002 Annual Report") incorporated herein by reference. We caution investors that forward-looking statements reflect our analysis only on their stated date. We disclaim any intent to update them except as required by law.

General Description and Development of Businesses

The information required by this item is incorporated by reference to the captions "To Our Shareholders" and "Business Review" in the 2002 Annual Report.

Research and Development

Our Company-sponsored research and development expenditures during the fiscal years ended October 31, 2002, 2001 and 2000 were \$4.3 million, \$3.7 million and \$2.7 million, respectively. During fiscal 2002, CooperVision spent about 66% and CooperSurgical spent about 34% of the total. We did not conduct any customer-sponsored research and development programs.

Cooper employs 58 people in its research and development and manufacturing engineering departments. Outside specialists in lens design, formulation science, polymer chemistry, microbiology and biochemistry support product development and clinical research for CVI products. CSI conducts research and development in-house and also employs outside surgical specialists, including members of its surgical advisory board.

Government Regulation

The U.S. Food and Drug Administration ("FDA"), other federal agencies and various foreign ministries of health regulate the development, testing, production and marketing of the Company's products. The Federal Food, Drug and Cosmetic Act and other statutes and regulations govern the testing, manufacturing, labeling, storage, advertising and promotion of these products. If applicable regulations are not followed, companies may be subject to fines, product recall or seizure, suspension of production and criminal prosecution.

Both CVI and CSI develop and market medical devices under different levels of FDA regulation depending on the classification of the device. Class III devices, such as flexible and extended wear contact lenses, require extensive premarket testing and approval, while Class I and II devices require substantially lower levels of regulation.

Before a new contact lens can be sold commercially, CVI must complete these steps: (1) compile data on its chemistry and toxicology, (2) determine its microbiological profile and (3) define the proposed manufacturing process. This data must be submitted to the FDA to support an application for an Investigational Device Exemption. Once this is granted, clinical trials can begin. These are subject to review and approval by an Institutional Review Board and, where a lens is determined to have a significant risk, the FDA. After the clinical trials are completed, a Premarket Approval Application must be submitted and approved by the FDA.

In connection with some of Cooper's new products, we can submit an expedited procedure known as a 510(k) application for premarket notification to the FDA. Any product that can demonstrate that it is substantially equivalent to another device marketed before May 28, 1976 can use this procedure. If the new product is not substantially equivalent to a preexisting device or if the FDA rejects a claim of substantial equivalence, FDA marketing clearance requires extensive preclinical and clinical testing, substantially increasing the cost and delaying the time to market.

FDA and state regulations also require the Company to adhere to applicable "good manufacturing practices" ("GMP"). They require detailed quality assurance and record keeping and periodic unscheduled regulatory inspections. The Company believes it is in compliance with GMP regulations.

Health authorities in foreign countries regulate Cooper's clinical trials and medical device sales. The regulations vary widely from country to country. Even if the FDA has approved a product, the regulatory agencies in each country must approve new products before they may be marketed there.

These regulatory procedures require considerable resources and usually result in a substantial delay between new product development and marketing. Cooper cannot assure that all necessary approvals will

be obtained, or obtained in a timely manner. If the Company does not maintain compliance with regulatory standards or if problems occur after marketing, product approval may be withdrawn.

All of Cooper's currently marketed products have been cleared by all appropriate regulatory agencies. None of our products are being marketed under Investigative Device Exemptions.

In addition to FDA regulatory requirements, the Company also maintains ISO 9000 certification and CE Mark approvals for all lens products. These quality programs and approvals are required by the European Medical Device Directive and must be maintained for all products intended to be sold in the European market. In order to maintain these quality benchmarks, the Company is subjected to rigorous biannual reassessment audits of its quality systems and procedures.

Raw Materials

CVI's raw materials primarily consist of various chemicals and packaging materials. There are alternative supply sources for each of them. Raw materials used by CSI are generally available from more than one source. However, because some products require specialized manufacturing procedures, CSI could experience inventory shortages if it were required to use an alternative manufacturer on short notice.

Marketing and Distribution

In the United States, Canada, United Kingdom, Italy, Spain, France, Holland, Sweden, Finland, Norway, Australia and South Africa, CVI markets its products through its field sales representatives, who call on optometrists, ophthalmologists, opticians and optical chains. In the United States, field sales representatives also call on distributors. In Japan and other countries outside North America, CVI uses distributors and has given most of them the exclusive right to market our products. In the United States, CVI augments its sales and marketing efforts with e-commerce, telemarketing and advertising in professional journals.

CSI's products are marketed worldwide by a network of field sales representatives and distributors. In the United States, CSI augments its sales and marketing activities with e-commerce, telemarketing, direct mail, advertising in professional journals, and the use of a direct mail catalog.

Patents, Trademarks and Licensing Agreements

Cooper owns or licenses a variety of domestic and foreign patents, which, in total, are material to its overall business. The names of certain of Cooper's products are protected by trademark registrations in the United States Patent and Trademark Office and, in some cases, also in foreign trademark offices. Applications are pending for additional trademark registrations. Cooper aggressively enforces and defends its intellectual property rights.

No individual patent or license is material to the Company or either of its principal subsidiaries other than the non-exclusive Patent License Agreement (the "License Agreement") dated as of December 2, 1997, between Cooper and Anthony Galley, Albert Moreland, Barry Bevis and Ivor Atkinson entered into in connection with the Company's acquisition of Aspect Vision Care Limited. The Agreement expires in January 2010. The Agreement relates to patents used by CVI to produce a unique contact lens edge that provides superior comfort to the wearer. The edge forms a part of CVI's products (both spherical and toric lenses) that are manufactured using a cast molding technology in the Company's Hamble, England and Norfolk, Virginia, USA facilities. Sales of these products constituted about 50% of the contact lenses sold by CVI in 2002.

In connection with the Company's acquisition of Biocompatibles Eye Care, Inc., we received a royalty-free license. The license agreement related to products manufactured by CVI using the proprietary phosphorylcholine ("PC") technology patents. Our Proclear Compatibles brand of sphere and toric soft contact lenses are manufactured using this PC technology.

In addition to trademarks and patent licenses, the Company owns certain trade secrets, copyrights, know-how and other intellectual property.

Dependence on Customers

Neither of Cooper's business segments depends to any material extent on any one customer or any one affiliated group of customers.

Government Contracts

Neither of our business units is materially subject to profit renegotiation or termination of contracts or subcontracts at the election of the United States government.

Competition

CVI and CSI each operate in a highly competitive environment. Competition in the medical device industry involves the search for technological and therapeutic innovations in the prevention, diagnosis and treatment of disease. Both of Cooper's businesses compete primarily on the basis of product quality and differentiation, technological benefit, service and reliability.

CVI

A number of manufacturers compete in the worldwide market for contact lenses, which was approximately \$3.1 billion in 2002. The three largest are Johnson & Johnson, CIBA Vision/Wesley Jessen (owned by Novartis AG) and Bausch & Lomb Incorporated.

The contact lens market has two major segments. The larger segment is lenses that only correct near- and farsightedness (the "commodity" segment). The smaller segment is lenses that address special needs of contact lens patients (the "specialty" segment). CooperVision competes successfully in the contact lens market primarily through its ability to market specialty contact lenses, although it also markets commodity lenses in order to satisfy customer demand in certain areas. The specialty lens segment includes toric, cosmetic, multifocal and premium lenses. In 2002, revenue of this specialty segment totaled about \$820 million. Approximately 70 percent of CVI's sales are specialty lenses.

To compete successfully in the contact lens market, companies must market differentiated products priced competitively and, therefore, manufactured efficiently and economically.

CVI believes that it is the only contact lens manufacturer to use three different manufacturing processes to produce its lenses (lathing, cast molding and FIPS, a cost effective combination of lathing and molding). This manufacturing flexibility means that CVI can:

- o Develop more lens types for patients than competitors (two week, monthly and quarterly disposable and custom toric products for patients with high amount of astigmatism).
- o Offer a wider range of lens parameters, which promote more successful fitting and better visual acuity.

In addition, CVI believes that its lenses provide superior comfort through its use of the edge technology provided under the patents covered by its License Agreement described under "Patents, Trademarks and Licensing Agreement." CVI also sponsors clinical studies to generate medical information to improve its lenses.

In order to enhance its competitiveness in the specialty market, in February 2002, Cooper completed the acquisition of Biocompatibles Eye Care, Inc. ("Biocompatibles") the contact lens business of Biocompatibles plc. Biocompatibles' Proclear line of products, both spherical and toric lenses, are manufactured with omafilcon A material, incorporating the proprietary phosphorylcholine technology that helps enhance tissue-device compatibility, and is the only lens with FDA clearance for the claim "... may provide improved comfort for contact lens wearers who experience mild discomfort or symptoms relating to dryness during lens wear." Mild discomfort relating to dryness during lens wear is a condition that often causes patients to drop out of lens wear.

Toric contact lenses that correct astigmatism are an important specialty lens category. They represented about \$365 million of the total worldwide market in 2002. CVI accounted for approximately \$110 million in calendar 2002, or about 30% of this market segment. The toric market segment is highly competitive. CVI's primary competitors in this segment are CIBA Vision/Wesley Jessen (owned by Novartis AG) and Bausch & Lomb Incorporated. Competition in the toric market segment is based primarily on how well lenses provide patients with successful fits and acceptable visual acuity, through offering a wide range of lens parameters, superior wearing comfort and, both for patients and contact lens practitioners, a high level of customer service. CVI believes that its three manufacturing processes yield a wider range of toric lens parameters than its competitors, allowing for more successful fits and better visual acuity.

Major competitors have greater financial resources and larger research and development budgets and sales forces than CVI. Nevertheless, CVI offers a high level of customer service, through its direct sales organizations around the world, who present its products to eyecare professionals and through telephone sales and technical service representatives who consult with eyecare professionals about the use of the Company's lens products, and high standards of product delivery time. CVI believes that its sales force is particularly well equipped through extensive training to meet the need of contact lens practitioners and their customers.

CVI also competes with manufacturers of eyeglasses and with refractive surgical procedures that correct visual defects. The Company believes that CVI will continue to compete favorably against eyeglasses, particularly in markets where the penetration of contact lenses in the vision correction market is low, offering lens manufacturers an opportunity to gain market share. The Company also believes that laser vision correction is not a material threat to its sales of contact lenses because each modality serves a different demographic group. Contact lens sales are driven by the teen-aged market, when over 90% of wearers begin their use. Refractive surgical procedures are primarily performed on patients in their late thirties or early forties.

CSI

CSI focuses on selected segments of the women's healthcare market, supplying high quality diagnostic products, surgical instruments and accessories and in some cases offering all of the products needed for a complete procedure. The market segments in which CSI competes continue to be fragmented, typified by smaller technology driven firms that generally offer only one or two product lines. Most are privately owned or divisions of public companies including some owned by companies with greater financial resources than Cooper. Competitive factors in these segments include technological and scientific advances, product quality, price, customer service and effective communication of product information to physicians and hospitals. CSI believes that it competes successfully against these companies with its

superior sales and marketing, the technological advantages of its products and by developing new products, including those used in new medical procedures. In addition, as CSI develops products, it offers to train medical professionals how to use them.

Backlog

Backlog is not a material factor in either of Cooper's businesses.

Seasonality

CVI's contact lens sales in the first fiscal quarter, which runs from November 1 through January 31, are typically lower than subsequent quarters, as patient traffic to practitioners' offices is relatively light during the holiday season.

Compliance with Environmental Laws

Federal, state and local provisions that regulate the discharge of materials into the environment, or relate to the protection of the environment, do not currently materially affect Cooper's capital expenditures, earnings or competitive position.

Working Capital

Cooper's businesses have not required any material working capital arrangements in the past five years.

Financial Information about Business Segments, Geographic Areas, Foreign Operations and Export Sales

The information required by this item is incorporated by reference to Note 12 "Business Segment Information" of Notes to Consolidated Financial Statements of the Company included in the 2002 Annual Report.

Employees

On October 31, 2002, Cooper had approximately 3,500 employees. The Company believes that its relations with its employees are good.

Item 2. Properties.

The following are Cooper's principal facilities as of October 31, 2002:

Location	Operations	Approximate Floor Area (Sq. Ft.)	Owned or Leased	Lease Expiration
United States				
Pleasanton, CA	Executive Offices	13,700	Leased	Sept. 2005
Lake Forest, CA	Executive Offices and CVI Offices	8,100	Leased	Jan. 2005
Huntington Beach, CA	CVI Manufacturing & Technical Offices	20,600	Leased	March 2007
Fairport, NY	CVI Administrative Offices & Marketing	27,900	Leased	April 2004
Scottsville, NY	CVI Manufacturing and Research	49,500	Owned	N/A
Henrietta, NY	CVI Distribution and Warehouse Facility	68,000	Leased	Feb. 2003
Norfolk, VA	CVI Manufacturing, Offices and Warehouse Facilities	39,000	Owned	N/A
Trumbull, CT	CSI Manufacturing, Research and Development, Marketing, Distribution and Warehouse Facilities	92,000	Leased	June 2011
Canada				
Markham, Ont.	CVI Offices, Manufacturing Distribution and Warehouse Facilities	23,000	Leased	Feb. 2005
United Kingdom				
Hamble, Hampshire, England	CVI Manufacturing, Research and Development, Marketing and Admin. Offices	60,600	Owned	N/A
Fareham, Hampshire, England	CVI Manufacturing and Administrative	30,800	Leased	Jan. 2018
Fareham, Hampshire, England	CVI Manufacturing and Warehouse	27,100	Leased	June 2018
Fareham, Hampshire, England	CVI Manufacturing	33,000	Leased	Sept. 2023
Finland				
Helsinki	CVI Manufacturing and Administrative	20,300	Owned	N/A
Italy				
Milan	CVI Warehouse and Administrative	28,900	Leased	Sept. 2006
Australia				
South Australia	CVI Manufacturing, Distribution and Administration	14,800	Leased	June 2004

The Company believes its properties are suitable and adequate for its businesses.

Item 3. Legal Proceedings.

The information required by this item is incorporated by reference to the heading "Pending Litigation" in Note 11 "Commitments and Contingencies" to the Financial Statements in the 2002 Annual Report.

Item 4. Submission of Matters to a Vote of Security Holders.

During the fourth quarter of fiscal 2002, the Company did not submit any matters to a vote of the Company's security holders.

PART II

Item 5. Market for Registrant's Common Equity and Related Stockholder Matters.

The following unregistered sales of securities by the Company occurred during fiscal 2002. All such securities were issued in reliance upon the exemption from registration contained in Section 4(2) of the Securities Act of 1933, as amended.

Distribution of 7,117 shares from our treasury shares on October 17, 2002 to former shareholders of Medasonics, Inc.

Additional information required by this item is incorporated by reference to "Quarterly Common Stock Price Range," "Corporate Information," and the heading "Cash Dividends" in Note 8 "Stockholders' Equity" to the Financial Statements in the 2002 Annual Report.

Item 6. Selected Financial Data.

The information required by this item is incorporated by reference to "Five Year Financial Highlights" in the 2002 Annual Report.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The information required by this item is incorporated by reference to "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the 2002 Annual Report.

Item 7A. Quantitative and Qualitative Disclosure about Market Risk.

The Company is primarily exposed to market risks that relate principally to changes in interest rates and foreign currency fluctuations. The Company's policy is to minimize, to the extent reasonable and practical, its exposure to the impact of changing interest rates and foreign currency fluctuations by entering into interest rate swaps and foreign currency forward exchange contracts, respectively. The Company does not enter into derivative financial instrument transactions for speculative purposes. Additional information for this item is incorporated by reference to "Derivatives" in Note 1 "Summary of Significant Accounting Policies" and in Note 7 "Financial Instruments" to the Financial Statements in the 2002 Annual Report.

Long-term Debt

Total debt increased to \$163.6 million at October 31, 2002 from \$68.8 million at October 31, 2001, primarily to fund payments for acquisitions totaling \$136.1 million. Our new \$225 million KeyBank line of credit (see caption "KeyBank Line of Credit" in Note 6 "Debt" in the 2002 Annual Report, which is incorporated here by reference) was utilized for the additional funding requirements.

	October 31, 2002	October 31, 2001
	-----	-----
	(In millions)	
Short term	\$ 36.3	\$ 8.2
Long term	127.3	60.6
	-----	-----
Total	\$163.6	\$68.8
	=====	=====

As of October 31, 2002, the scheduled maturities of each of the Company's fixed and variable rate long-term debt obligations (excluding capitalized leases), their weighted average interest rates and their estimated fair values were as follows:

	Expected Maturity Date - Fiscal Year							

	2003	2004	2005	2006	2007	There- after	Total	Fair Value
	-----	-----	-----	-----	-----	-----	-----	-----
(\$ in Millions)								
Long-term debt:								
Fixed interest rate	\$22.3	\$ --	\$ --	\$ --	\$ --	\$ --	\$ 22.3	\$ 22.3
Average interest rate	8.0%							
Variable interest rate	\$ 9.7	\$19.5	\$76.4	\$19.0	\$9.6	\$0.3	\$134.4	\$134.4
Average interest rate	3.8%	3.8%	3.8%	3.7%	3.8%	4.9%		

Interest Rate Exposures

The Company enters into interest rate swap agreements to minimize the impact of changes in interest rates on its variable rate long-term debt obligations. The Company currently has two interest rate swap agreements for \$1.9 million and 'L'2.5 million of its outstanding variable rate debt obligations. These instruments have the effect of converting variable rate instruments to fixed rate instruments. The swaps fix the interest rate at 4.9% on \$1.9 million variable-rate debt due January 2012 and at 7.1% on 'L'2.5 million variable rate due April 2003. The table below shows the notional amount and weighted average interest rates of each of the Company's interest rate swaps by maturity. The receive rate is based on October 31, 2002 rate, and projected based on the consumer price index. Notional amounts are used to calculate the contractual payments to be made under the contracts.

	Notional Amounts Maturing in Fiscal Year							

	2003	2004	2005	2006	2007	There- after	Total	Fair Value
	-----	-----	-----	-----	-----	-----	-----	-----
(\$ in Millions)								
Interest rate swaps:								
Variable to fixed	\$0.3	\$0.3	\$0.3	\$0.3	\$0.3	\$0.4	\$1.9	\$0.2
Average pay rate	4.9%	4.9%	4.9%	4.9%	4.9%	4.9%	4.9%	
Average receive rate	1.0%	1.0%	1.0%	1.0%	1.0%	1.1%	1.1%	
Variable to fixed	\$3.9	\$ --	\$ --	\$ --	\$ --	\$ --	\$3.9	\$ --
Average pay rate	7.1%	%						
Average receive rate	4.1%	%					4.1%	

Foreign Currency Exposures

The Company uses forward exchange contracts to minimize the effect of foreign currency fluctuations on its intercompany receivables denominated in Canadian dollars and its long-term debt obligations denominated in Great Britain Pounds ("GBP"), incurred to fund a portion of the Company's acquisition of Aspect Vision Care Ltd. The following table provides information on the Company's foreign currency forward exchange contracts. The information is provided in U.S. Dollar equivalent amounts, which is the way it is presented in the Company's financial statements. The table shows the notional amounts at the contract exchange rates and the weighted average contractual foreign currency exchange rates by expected maturity dates.

	Notional Amounts Maturing	
	2003	Fair Value
	-----	-----
Foreign contracts to buy GBP:		
Notional amount (in millions)	\$24.2	\$1.8
Average contractual exchange rate	\$1.69	
Foreign contracts to sell Canadian \$:		
Notional amount (in millions)	\$ 4.7	--
Average contractual exchange rate:	\$0.63	

Item 8. Financial Statements and Supplementary Data.

The information required by this item is incorporated by reference to "Consolidated Balance Sheets," "Consolidated Statements of Income," "Consolidated Statements of Cash Flows," "Consolidated Statements of Comprehensive Income," "Notes to Consolidated Financial Statements," "Independent Auditors' Report" and "Two Year Quarterly Financial Data" in the 2002 Annual Report.

Item 9. Changes In and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

PART III

Item 10. Directors and Executive Officers of the Registrant.

The information required by this item is incorporated by reference to "Election of Directors" and "Executive Officers of the Company" in the Company's Proxy Statement for the Annual Meeting of Stockholders to be held on March 25, 2003 (the "2003 Proxy Statement").

Item 11. Executive Compensation.

The information required by this item is incorporated by reference to the subheadings "Executive Compensation" and "Board Committees, Meetings and Compensation" of the "Election of Directors" section of the 2003 Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management.

The information required by this item is incorporated by reference to the subheadings "Securities Held by Management" and "Principal Security Holders" of the "Election of Directors" section of the 2003 Proxy Statement.

Item 13. Certain Relationships and Related Transactions.

Not applicable.

Item 14. Controls and Procedures.

The Company has established and currently maintains disclosure controls and procedures designed to ensure that material information required to be disclosed in its reports filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported, within the time periods specified by the Securities and Exchange Commission and that any material information relating to the Company is recorded, processed, summarized and reported to its principal officers to allow timely decisions regarding required disclosures. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and in reaching a reasonable level of assurance, management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

In conjunction with the close of each fiscal quarter, the Company conducts a review and evaluation of the effectiveness of the Company's disclosure controls and procedures. The Company's Chief Executive Officer and President, based upon an evaluation completed within 90 days prior to the filing of this report, has concluded that the Company's disclosure controls and procedures are effective. There have been no significant changes in the Company's internal controls or in other factors that could significantly affect internal controls subsequent to October 31, 2002.

PART IV

Item 15. Exhibits, Financial Statement Schedules, and Reports on Form 8-K.

(a) Documents filed as part of this report:

1. Accountants' Consent and Report on Schedule.
2. Financial Statement Schedule of the Company.

Schedule Number	Description
-----	-----
Schedule II	Valuation and Qualifying Accounts

3. Exhibits

The exhibits listed on the accompanying Exhibit Index are filed as part of this report.

All other schedules which are included in the applicable accounting regulations of the Securities and Exchange Commission are not required here because they are not applicable.

(b) Reports filed on Form 8-K:

Cooper filed the following reports on Form 8-K during the period August 1, 2002 through October 31, 2002.

September 4, 2002 -- Item 5. Other Events.
October 2, 2002 -- Item 5. Other Events.
October 3, 2002 -- Item 5. Other Events.

ACCOUNTANTS' CONSENT AND REPORT ON SCHEDULE

The Board of Directors
THE COOPER COMPANIES, INC.:

Under date December 11, 2002, we reported on the consolidated balance sheets of The Cooper Companies, Inc. and subsidiaries (the "Company") as of October 31, 2002 and 2001, and the related consolidated statements of income, comprehensive income and cash flows for each of the years in the three-year period ended October 31, 2002, which are incorporated herein by reference. In connection with our audits of the aforementioned consolidated financial statements, we also audited the related consolidated financial statement schedule as listed in Item 15 of the Annual Report on Form 10-K. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement schedule based on our audits. In our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We consent to incorporation by reference in Registration Statement Nos. 33-50016, 33-11298, 33-22417, 33-25051, 33-27639, 33-40431, 33-80795, 33-48152 and 33-34206 on Forms S-3 and Registration Statement Nos. 333-10997, 33-27938, 33-36325, 33-36326, 33-58839, 33-67954 and 333-101366 on Forms S-8 of The Cooper Companies, Inc. of our reports dated December 11, 2002, relating to the consolidated balance sheets of The Cooper Companies, Inc. and subsidiaries as of October 31, 2002 and 2001 and the related consolidated statements of income, comprehensive income and cash flows for each of the years in the three-year period ended October 31, 2002, and related schedule, which reports appear in or are incorporated by reference to the October 31, 2002 Annual Report on Form 10-K of The Cooper Companies, Inc.

CERTIFICATIONS

I, A. Thomas Bender, Chairman of the Board, President and Chief Executive Officer, certify that:

1. I have reviewed this annual report on Form 10-K of The Cooper Companies, Inc. (the "registrant");

2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report;

3. Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and have:

a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;

b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this annual report (the "Evaluation Date"); and

c) presented in this annual report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):

a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this annual report whether there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

AMENDMENT NO. 7 TO
THE 1996 LONG TERM INCENTIVE PLAN FOR NON-EMPLOYEE DIRECTORS
OF THE COOPER COMPANIES, INC.

WHEREAS, The Cooper Companies, Inc. (the "Company") has adopted The 1996 Long Term Incentive Plan for Non-Employee Directors of The Cooper Companies, Inc. (the "Plan"); and

WHEREAS, Section 11 of the Plan permits the Board of Directors of the Company to amend the Plan, subject to certain limitations; and

WHEREAS, the Board of Directors of the Company desires to amend the Plan in certain respects;

NOW, THEREFORE, the Plan is hereby amended as follows:

FIRST: Paragraph (c) of Section 7 of the Plan is hereby amended by deleting the number "20%," where it appears, and by inserting the number "10%" in its stead.

SECOND: The provisions of Paragraphs First through Third hereof shall be effective as of October 29, 2002.

THIRD: Except to the extent herein above set forth, the Plan shall remain in full force and effect.

IN WITNESS WHEREOF, the Board of Directors of the Company has caused this Amendment No. 7 to the Plan to be executed by a duly authorized officer of the Company as of October 29, 2002.

2002 Annual Report

[PERFORMANCE GRAPH]

Five Year Chart Of Cooper's Share Price Performance

All per share figures in this report reflect the two-for-one stock split effected the form of a stock dividend on November 22, 2002.

Important Events in 2002

CooperVision

- o Revenue grew 38 percent to \$244 million.
- o Acquired Biocompatibles Eyecare, Inc., a manufacturer of specialty contact lenses that contributed \$56 million to 2002 revenue.

2002 Financial Summary

- o Revenue \$315 million, up 34 percent.
- o Operating income \$67 million, up 22 percent
- o Diluted earnings per share \$1.57, up 29 percent
- o Soft contact lens revenue (excluding miscellaneous revenue and sales to other manufacturers) reached \$232 million, up 10 percent on a pro forma basis that includes Biocompatibles revenue as if Cooper owned it for the eight months ended October 31, 2001.
- o Settled patent litigation with CIBA Vision regarding cosmetic contact lens.
- o The Japanese health authorities notified Rohto Pharmaceutical, Ltd., CVI's marketing partner in Japan, that the material from which CVI manufactures its disposable spherical, aspheric, toric and multifocal contact lenses was cleared for marketing.

CooperSurgical

2003 Outlook

- o Revenue \$380 to \$400 million
- o Earnings per share \$1.98 to \$2.03
- o Grew revenue 22 percent to \$71 million.
- o Acquired the bone densitometry business of Norland Medical Systems, Inc., used in the evaluation of osteoporosis.
- o Acquired Ackrad Laboratories, Inc., and Sage BioPharma, both suppliers of products for infertility.
- o Completed a significant expansion of its facilities to support its growing business.

The Cooper Companies

- o Secured a new \$225 million credit facility through KeyBank.
- o Effected a two-for-one stock split in the form of a stock dividend.
- o Reduced the Company's effective tax rate to 25 percent and extended through 2006 the complete utilization of its net operating loss carryforwards.
- o Ranked 76th on Forbes Magazine's list of 200 best small companies for 2002.

"The Cooper Companies had another strong year, continuing the consistent performance it has delivered annually since 1995."

A. Thomas Bender
Chairman, President and
Chief Executive Officer

To Our Shareholders

In 2002, The Cooper Companies delivered another year of strong performance to its shareholders. With sustained organic growth and the acquisition of Biocompatibles Eyecare, Inc., a specialty contact lens manufacturer, revenue grew 34 percent, diluted earnings per share rose 29 percent and cash flow per share increased 18 percent.

Since 1997, Cooper's revenue has grown at a compounded annual rate of 29 percent, its operating income at 28 percent, its earnings per share from continuing operations at 32 percent and its cash flow per share at 27 percent.

Revenue at CooperVision (CVI), our contact lens business, has grown at a compounded annual rate of 31 percent, and CVI is now the fastest growing and one of the world's leading contact lens manufacturers. Over the next three years, new products and geographic expansion will, we anticipate, generate percentage revenue growth in the low to mid-teens as growth accelerates in our specialty lens franchise around the world.

CooperSurgical (CSI), our women's healthcare business, has achieved significant scale during this period. With revenue growing at a compounded annual rate of 24 percent since 1997 and expected revenue in 2003 approaching \$85 million, CSI is now a major manufacturer and marketer of medical device products for the women's healthcare market and, we believe, the largest supplier of gynecology devices for the physician's office in the United States.

[TWO PERFORMANCE GRAPHS]

Revenue (in millions)	1998	1999	2000	2001	2002
-----	-----	-----	-----	-----	-----
COOPERVISION (CVI)	120.2	138.1	154.8	176.1	243.9
COOPERSURGICAL (CSI)	28.7	30.1	46.4	58.5	71.4
Operating Income (in millions)	1998	1999	2000	2001	2002
-----	-----	-----	-----	-----	-----
COOPERVISION (CVI)	34.6	40.8	47.3	51.4	60.4
COOPERSURGICAL (CSI)	2.1	4.3	6.3	10.1	14.1

Other important financial measures also reflect Cooper's consistent performance over the past five years:

- o Cash flow (pretax income from continuing operations plus depreciation and amortization) per share has grown from \$.97 to \$2.45.
- o Our effective tax rate has declined to 25 percent, and we have extended through 2006 the complete utilization of our net operating loss carryforwards.
- o One hundred shares of Cooper stock that cost \$719 on October 31, 1996 more than tripled to \$2,650 by the end of 2002. During this period, the Company's market capitalization grew from \$168 million to \$818 million.

This consistent performance reflects the commitment of Cooper's employees, and we thank them for their continued dedication and hard work.

Favorable Market Environments

Despite slow economic growth worldwide during the past year, the soft contact lens market remains attractive, growing at about 7 percent to an estimated \$3.1 billion in 2002, and forecast to grow about 7 percent to 8 percent annually over the near term.

As improving demographics - the "baby echo" generation that began in the late 1990's - bring new patients into the market, growing penetration of specialty and value-added contact lenses in countries outside the United States adds to its vitality. Capitalizing on this trend, in February, Cooper acquired Biocompatibles Eyecare, Inc., a manufacturer of specialty lenses.

We expect that Biocompatibles' Proclear Compatibles lenses will be the basis for a new generation of improved CVI contact lenses. Made with the omafilcon A material, which incorporates phosphorylcholine to enhance lens and tissue compatibility, Proclear Compatibles lenses significantly improve the wearing experience for many contact lens users.

We plan to expand the distribution of Proclear toric lenses and introduce Proclear products in aspheric, multifocal and extended wear formats over the next several years. These new products will complement the existing Proclear spherical lens line, which can improve comfort for patients who experience periodic dryness of the eye.

Toric lenses, used to correct astigmatism, a visual defect caused by corneal irregularity, are the fastest growing segment of the worldwide contact lens market,

with the two-week disposable lens category growing most rapidly. Torics are CooperVision's leading products, accounting for about 45 percent of its worldwide soft lens revenue.

CVI's Frequency Aspheric, a value-added product that provides a crisper quality of vision and improved acuity in low light conditions, has become the worldwide leader in its market category.

CVI has incorporated aspheric technology into its cosmetic lenses, Frequency Colors and Frequency Expressions, and now competes effectively in the estimated \$265 million worldwide cosmetic contact lens segment. We were especially pleased that during the fourth quarter we settled our patent litigation regarding cosmetic contact lenses with Wesley Jessen Corporation, a division of CIBA Vision.

Frequency Multifocal, a disposable specialty lens for patients with presbyopia, has been enthusiastically received in the United States, and we expect to launch this product in Europe in mid-2003.

In Japan, the world's second largest contact lens market, demand for disposable specialty soft contact lenses is increasing. More than 80 percent of Japan's near-sighted patients also have astigmatism, offering CVI, with its broad line of toric lenses, a solid growth opportunity.

In September, the Japanese Ministry of Health and Welfare notified CVI's marketing partner in Japan, Rohto Pharmaceutical Company, Ltd., that it had cleared Rohto to market the material from which CVI manufactures its contact lenses. We expect that Rohto will begin to market these lenses in Japan in the first quarter of calendar 2003.

Favorable demographic trends also influence our women's healthcare business. Many women of the "baby boomer" generation have reached the age when they require diagnosis and treatment of gynecological disorders, and physicians use CooperSurgical products in many of these procedures.

During 2002, CSI continued to consolidate the fragmented medical device segment of the women's healthcare market by completing three acquisitions: Ackrad Laboratories, Inc. and Sage BioPharma, both of which offer products used in the treatment of infertility, and the bone densitometry business of Norland Medical Systems, Inc. whose products help evaluate osteoporosis. To accommodate the growth of its business, CSI also completed a major expansion of its physical facilities during the year.

[GROUP PHOTO]

In October, Cooper management met with executives of the New York Stock Exchange and participated in the traditional opening bell ceremony.

Corporate Activities

- o In May, the Company secured a new \$225 million credit facility through KeyBank to finance the Biocompatibles acquisition and restructure its existing debt on more favorable terms.
- o In November, just after the end of our fiscal year, the board of directors authorized a two-for-one stock split, effected in the form of a stock dividend, in order to broaden the ownership base of Cooper common stock.
- o Through the continued implementation of our worldwide corporate tax plan, we reduced the Company's effective tax rate to 25 percent and extended through 2006 the complete utilization of its net operating loss carryforwards.
- o Forbes Magazine ranked Cooper 76th on its list of the best 200 small companies for 2002. Included in their evaluation is a board of directors score of 94, which means that the Company's board of directors has better corporate governance standards as judged by Institutional Shareholders Services than more than 94 percent of the companies its size.

Looking Ahead

We expect Cooper's momentum to continue in 2003. We anticipate revenue of about \$380 to \$400 million and earnings per share in the range of \$1.98 to \$2.03. At CooperVision, we expect recently introduced contact lens products and geographic expansion in Europe and Japan to drive our incremental growth. At CooperSurgical, we will continue to pursue our strategy to profitably consolidate the medical device segment of the women's healthcare market.

Thank you for your continued support.

Business Review

The Cooper Companies, Inc.

In 2002, The Cooper Companies reported sales of \$315 million, a 34 percent increase over 2001. CVI's revenue grew to \$244 million, up 38 percent, including revenue of \$56 million from the contact lens business of Biocompatibles, plc, acquired in February. CSI revenue grew to \$71 million, a 22 percent increase that includes revenue from product lines added through acquisition during the past 12 months. Earnings per share grew 29 percent to \$1.57. Cash flow per share reached \$2.45, up from \$2.07 the previous year.

CooperVision

We estimate that the worldwide soft contact lens market grew about 7 percent in 2002 to about \$3.1 billion. In the United States, about 42 percent of the worldwide market, revenue grew about 7 percent to \$1.3 billion, while revenue in countries outside the United States grew by 6 percent to \$1.8 billion.

Japan and the Pacific Rim countries, about \$860 million or 27 percent of the world market, grew about 7 percent. Europe, about \$635 million or 20 percent of the market, grew about 6 percent. In the Middle East and Latin America, unfavorable political and economic conditions combined to lower market growth.

Longer term, favorable demographics and a continuing shift in practitioner preferences from low-featured "commodity" lenses to higher value specialty lenses support a favorable world market outlook.

CooperVision is particularly strong in the specialty lens segment of the market. This includes toric lenses that correct astigmatism, cosmetic lenses that change the appearance of the color of the eye, lenses for patients who experience dry eye, long-term extended wear lenses, and multifocal lenses for presbyopia - the blurring of near vision that occurs with aging.

These product lines offer more profitable and faster growing opportunities than the commodity spherical lenses that correct only near - and farsightedness. Specialty lenses currently account for about a fourth of the worldwide contact lens market and more than 40 percent of the market in the U.S. Their 16 percent share of the market outside the U.S. offers CVI, with its broad specialty product line, an attractive opportunity to expand their acceptance.

Acquisition of Biocompatibles

In February, Cooper completed the acquisition of the world's sixth largest contact lens manufacturer, Biocompatibles Eye Care, Inc., the contact lens business of Biocompatibles plc. Biocompatibles added about \$56 million to CVI's 2002 revenue, about 70 percent of this outside of North America. Its Proclear line of products, manufactured with proprietary phosphorylcholine technology that helps enhance tissue-device compatibility, accounts for about 45 percent of its revenue. Biocompatibles' Proclear lenses are often indicated for patients with mild discomfort relating to dryness during lens wear, a condition that often causes patients to drop out of lens wear.

Proclear Technology
[PHOTO]

[GRAPHIC]

Incorporating phosphorylcholine into Proclear lenses creates a biocompatible layer of synthetic lipids similar to that found in human cell membranes. By mimicking the eye's natural cell components, the material closely binds water in and around the lens.

[GRAPHIC]

Proclear lenses complement CooperVision's portfolio of specialty contact lenses that enable practitioners to strengthen patient loyalty by selecting the best lens for each individual's needs.

[GRAPHIC]

Proclear lenses are the only lenses to date to receive FDA clearance for the claim, "may provide improved comfort for contact lens wearers who experience mild discomfort or symptoms relating to dryness during lens wear."

PHOSPHORYLCHOLINE TECHNOLOGY

The development of phosphorylcholine technology began in the 1970's with Professor Dennis Chapman and his colleagues at the Royal Free Hospital in London, while they researched biocompatibility, the ability of a material to interface within the body without provoking an adverse biological response. They examined phosphorylcholine (PC), a substance in the human cell membrane, identifying it as one of the primary materials responsible for biocompatibility.

When a foreign material enters the body, "rejection" begins immediately, coating the material with proteins, lipids and other cells. These effects are minimized, however, when electrically neutral PC, a major component of the outer human cell membrane, is coated on or incorporated into the foreign material. PC also binds water tightly around it, making it difficult for other materials to interact with the PC surface. An electrically neutral surface that resists adhesion and deposits is very useful for devices like contact lenses that are in constant contact with body fluids.

[PC TECHNOLOGY LOGO]

PC AND CONTACT LENSES

PC technology has significantly improved the wearing experience for contact lens wearers, especially those who experience periodic dryness, particularly at the end of the day. When PC is incorporated into a soft contact lens material known as omafilcon A, its affinity for water gives omafilcon A superior water retention characteristics. This was demonstrated in clinical trials reviewed by the U.S. Food and Drug Administration and to date, omafilcon A is the only lens material to receive clearance for the claim: "...may provide improved comfort for contact lens wearers who experience mild discomfort or symptoms relating to dryness during lens wear."

CooperVision markets spherical and toric lenses made from omafilcon A worldwide under the Proclear Compatibles™ brand.

[PROCLEAR TORIC LOGO] [PROCLEAR LOGO]

CVI's 2002 Soft Lens Revenue Growth

CVI's soft contact lens revenue -- total revenue less sales to other contact lens manufacturers and other miscellaneous revenue -- grew 10 percent in 2002 on a pro forma basis that includes Biocompatibles revenue as if Cooper owned it for the eight months ended October 31, 2001. In contrast, we estimate that the world market grew about 7 percent.

CVI's soft contact lens revenue in the United States grew 10 percent and 11 percent in markets outside the U.S. We estimate that since 1997, CVI has doubled its market share, both in the United States and worldwide. CVI now holds about 11 percent of the United States market and about 9 percent of the worldwide market.

Specialty Contact Lenses

Specialty contact lenses meet the visual correction needs of patients whose requirements go beyond the correction of near- and farsightedness. We estimate that products in these categories account for about 26 percent of worldwide contact lens revenue.

In the United States, we estimate that sales of specialty products exceed \$500 million, about 40 percent of the total market. While toric and cosmetic lenses, the fastest growing segments, account for the majority of revenues in this category, multifocal, value added lenses -- for patients with dry eye syndrome, for example -- and long-term extended wear lenses also offer attractive business opportunities.

In 2002, sales of CVI's toric lenses, its most extensive product line, grew 11 percent and now account for about 45 percent of its total soft lens revenue. We estimate that the worldwide toric market grew about 10 percent during this period.

Cosmetic Lenses

Worldwide, the cosmetic lens market segment is growing at about 11 percent annually with estimated sales of approximately \$265 million -- about \$165 million in the United States.

CVI's line of disposable cosmetic contact lenses that change or enhance the appearance of the color of the eye-called Frequency Expressions in the United States and Frequency Colors in the rest of the world-continued to gain acceptance during 2002, and the line was expanded to eight lens colors. During the first quarter of 2003, CVI plans to introduce its Enhancements line -- lenses that accent rather than change the natural color of the eye.

In the fourth quarter, CVI settled its patent litigation suit regarding cosmetic lenses with Wesley Jessen, a division of CIBA Vision. While the terms of the settlement are confidential, the agreement allows CooperVision to continue selling its existing

cosmetic lens products throughout the world. CIBA Vision has agreed to license its color contact lens patents to CVI in return for a royalty and a cross-license of some of CooperVision's cosmetic lens intellectual property rights.

New Specialty Products

During 2002, CVI continued to expand the distribution in the United States of Frequency Multifocal, a disposable product for patients with presbyopia, the blurring of near vision that occurs with aging. Practitioners who have used it are impressed with its performance.

In November, CVI introduced Frequency Toric XR, the only monthly disposable planned replacement lens available in the United States for astigmatic patients requiring complex vision correction.

In the next two years, CVI expects to significantly expand the Proclear Compatibles product line, effectively launching a new generation of lenses. These plans include:

- o Expanding United States distribution of Proclear Toric lenses, which are in wide distribution overseas, in January 2003.
- o Launching Proclear Aspheric worldwide in the third quarter of 2003.
- o Introducing Proclear Multifocal lenses worldwide in 2004.

Other expected new product launches in this period include:

- o CVI's line of frequently replaced lenses in Japan in February of 2003 through Rohto Pharmaceutical Co., Ltd., CVI's Japanese marketing partner.
- o Frequency Multifocal in markets outside the United States in the third quarter of fiscal 2003.
- o Enhancement Colors, a new line of disposable cosmetic products that accentuates the natural color of the eye, in February 2003 in the United States and in markets outside the U.S. later in the year. These products complement our line of opaque lenses that change the appearance of the color of the eye.

CVI Growth in Markets Outside the United States

In 2002, CVI's revenue in markets outside the United States grew 11 percent and now represents about 45 percent of its soft lens sales.

Europe

CVI's European soft lens revenue grew 21 percent over 2001 due largely to the sales of toric lenses, which grew 70 percent. CVI estimates that it is now the third largest contact lens supplier in Europe, with business units in Holland, Italy, Scandinavia, Spain and the United Kingdom, a subsidiary and an exclusive distributor in France and an exclusive distributor in Germany.

Japan

CVI's marketing partner in Japan, Rohto Pharmaceutical Company, Ltd., received clearance from the Japanese Ministry of Health and Welfare in September to market products made from the methafilcon A polymer. These include CVI's disposable spherical, aspheric, toric and multifocal contact lenses.

With approximately 10 million contact lens wearers, Japan is the second largest contact lens market in the world after the United States, and soft lens popularity continues to grow. CVI estimates that the total market for soft contact lenses in Japan and the Pacific Rim today is about \$860 million, compared with about \$1.3 billion in the United States. The Japanese market, growing at about 7 percent per year, is currently divided equally between daily and two week disposable lenses.

The incidence of near-sightedness in Japan is one of the highest in the world. About 80 percent of the nearsighted population has some degree of astigmatism, significantly greater than the 50 percent of those in the United States who do. About half of those with astigmatism are potential candidates for toric lenses. The Japanese toric segment, currently a smaller percentage of the total market than it is in the U.S., is expected to grow rapidly as newer generations of toric lenses are introduced.

Rohto Pharmaceutical Company, Ltd. is a leading manufacturer of contact lens care products, holding, according to its estimates, a 30 percent share of the market for non-pharmaceutical ophthalmic products in Japan. Rohto's total revenue approaches \$500 million, most from Pacific Rim countries. Non-prescription ophthalmic products account for about one-third of its worldwide revenue. Rohto plans to capitalize on its well-established eyecare and contact lens care brands and use a combination of professional and consumer promotion to introduce CVI's contact lens products.

Looking Ahead

CVI's business goals are to continue its revenue growth at one and a half to two times the rate of the world market and to become the world's largest specialty contact lens provider by mid decade. In 2003, we expect revenue of about \$300 million at CVI.

CooperSurgical

Historically, many small medical device companies have supplied the women's healthcare market with a wide range of products through a fragmented distribution system. Over 75 of these serve the large number and varied types of women's healthcare providers in the United States today. There are nearly 33,000 obstetricians/gynecologists (Ob/Gyn's) under the age of 65 practicing at 16,100 locations in the United States, as well as 5,250 hospitals with clinics, outpatient and surgical facilities, plus 370 fertility clinics specializing in assisted reproductive technologies. While general medical practitioners play an important role in women's primary healthcare, the Ob/Gyn is the reproductive health specialist and the primary customer for associated medical devices.

Women's Health Background

Currently, over 90 million women between 15 and 64 years old visit an Ob/Gyn in the United States at least once each year, with over 70 million visits related to gynecologic complaints. Some significant features of this market are:

- o Two-thirds of patient visits are for annual check-ups, cancer screening, menstrual disorders, vaginitis (inflammation of vaginal tissue), osteoporosis and the management of menopause. The rest are for pregnancy and reproductive management. Consistent with an aging population, visits for menstrual disorders and menopause are growing.
- o Osteoporosis (reduction in bone mass) and incontinence have also become frequent diagnoses as the female population ages. Their early identification and treatment will both improve the health of these women and help reduce costs in the U.S. health care system. According to government estimates, each of these conditions costs the healthcare system about \$15 billion annually.
- o An estimated 4.5 million patients visit physicians for monitoring and treatment of abnormal Pap smears.

[GRAPHIC]

 assisted reproductive technology.

ASSISTED REPRODUCTIVE TECHNOLOGIES

On July 25, 1978, Louise Joy Brown, the world's first successful 'test-tube' baby, was born in Great Britain after 12 years of research in assisted reproductive technology (ART) by Dr. Patrick Steptoe, a gynecologist at Oldham General Hospital, and Dr. Robert Edwards, a physiologist at Cambridge University. Introduced in the United States in 1981, ART has grown rapidly since, and to date, more than 170,000 babies have resulted.

Infertility affects about 6.1 million women and their partners annually in the U.S. Conventional techniques including ovulatory drugs and intrauterine insemination (IUI) treat between 85 to 95 percent of these cases.

Less than 5 percent of infertility cases require in vitro fertilization or other ART procedures. Physicians use these advanced techniques primarily with women whose fallopian tubes are blocked or absent, those with severe endometriosis, in couples where the male has a low sperm count and in some cases of unexplained infertility.

In 1992, scientists introduced a new technique that offers hope for couples with male factor: sperm was injected directly into the woman's egg to facilitate fertilization. This technique, called intracytoplasmic sperm injection or ICSI, is performed in conjunction with about 40 percent of the in vitro fertilization procedures. Sage BioPharma, CSI's most recent acquisition, supplies products used in ICSI procedures.

INFERTILITY TREATMENT OPTIONS

TREATMENT OPTION	INDICATION	PROCEDURE
Intrauterine insemination (IUI)	Sexual dysfunction Sperm hostility Abnormal ovulation	The injection of prepared sperm into the uterus by means of a catheter directed through the cervix.
In-vitro Fertilization (IVF)	Male infertility Tubal disease Endometriosis Unexplained infertility Recurrent failure with IUI Age related infertility	Eggs are harvested from the female after ovulatory stimulation and combined with sperm in a Petri dish. Once the eggs have been fertilized, the embryos are placed into the uterus using specially designed catheters.
In-vitro Fertilization (IVF) with Intracytoplasmic Sperm Injection (ICSI)	Male infertility Unexplained infertility	Eggs are harvested from the female after ovulatory stimulation. Sperm is injected into the egg using micromanipulation. Once the eggs have been fertilized, the embryos are placed in the uterus using specially designed catheters.
Gamete Intrafallopian Transfer (GIFT)	Endometriosis Unexplained infertility Recurrent failure with IUI Age related infertility	An unfertilized egg and sperm are injected into the fallopian tube usually using a laparoscopic approach. Disadvantages include the inability to assess sperm quality to assess success or failure of procedure whereas the cost is comparable.
Zygote intrafallopian transfer (ZIFT)	Male infertility Endometriosis Unexplained infertility	A fertilized egg is transferred to the fallopian tube during a laparoscopic

Recurrent failure with
IUI Age related
infertility

procedure. This procedure has
been proven to offer no
clinical advantage to IVF, and
as a result is decreasing in
usage.

CooperSurgical Technologies

[PHOTO]

Commitment and dedication to reproductive medicine at Sage BioPharma has enabled many couples' dream of parenthood to come true.

SAGE

SAGE offers consumable products used by clinical embryologists and physicians in Assisted Reproductive Technologies, including IVF culture media, andrology products used in the assessment and improvement of male fertility, embryo transfer catheters, and retrieval needles used to obtain female eggs for in vitro fertilization.

The IVF Sequential Advantage Media lines, SAGE's principal products, are the first clinically proven media designed to optimize the in-vitro environment at every stage of embryo development. These culture media products improve the yield of viable embryos for transfer to the mother's womb.

SAGE also provides products to assess and improve male fertility, particularly products for semen preparation.

CSI will maintain SAGE's market leadership position by actively pursuing new technologies and products that provide improved treatment options.

[GRAPHIC]

Ackrad's H/S Elliptosphere is used primarily in fertility studies.

ACKRAD

Ackrad's principal product, which accounts for about 65 percent of its revenue, is the H/S Elliptosphere Catheter, used in hysterosalpingography (HSG) and saline contrast hysterosonography (SCHS), the noninvasive assessment of the female reproductive anatomy. Physicians use it primarily for fertility studies, and to assess abnormal uterine bleeding and pelvic pain. These tests show an outline of the uterine cavity and help detect abnormalities that cause infertility or repeated miscarriages.

[PHOTO]

The Excell™ uses dual energy x-ray adsorptiometry technology to help assess fracture risk.

NORLAND

CSI's Norland product line offers a complete line of bone assessment products. The McCue CUBA (Contact Ultrasound Bone Analyzer) is a portable, lightweight, and easy-to-use device to helps assess fracture risk. The APOLLO DXA performs dual x-ray absorptiometry scans of the heel; which help diagnose osteoporosis. The Excell is a full featured, compact central DXA system, which estimates bone mineral density of the spine and femur, measurements that help diagnose and monitor bone disorders, particularly osteoporosis.

OSTEOPOROSIS

Osteoporosis is characterized by excessive loss of bone mineral and deterioration of the skeleton over time. It generally occurs in women over the age of 45. The National Osteoporosis Foundation (NOF) estimates that osteoporosis affects more than 22 million women in the United States, and if unchecked, predicts that it will affect more than 30 million women by 2010 as the population ages. Annual direct medical expenditures for osteoporosis and associated fractures are \$13.8 billion, and are expected to increase to \$62 billion by the year 2020.

Until recently, osteoporosis was thought to be an inevitable and untreatable consequence of aging. The availability of more effective drug therapies and an increased focus on women's health issues and preventive medical practices have created a growing awareness among patients and physicians that osteoporosis is, in many cases, a disease that can be treated.

CSI Strategy

The small companies serving the women's healthcare market in the United States have traditionally offered limited product lines for a single procedure or disease. As these products matured and their growth slowed, many looked to exit the market.

CSI's strategy has been to identify and acquire selected smaller companies and product lines that can improve its existing market position or expand into new clinical areas. Of particular interest are opportunities in infertility and the healthcare needs of the aging female population.

Cooper's strong cash flow allows CSI to readily compete for these opportunities, and CSI has added 20 major products or product lines to date while executing this market consolidation strategy. CSI is now a leader in women's healthcare, a growing market driven by favorable demographics and advancing technology.

CSI 2002 Performance

During 2002, CSI revenue grew 22 percent to \$71.4 million. Internal organic growth was about 8 percent with the remainder coming from product or product line acquisitions. CSI now represents 23 percent of Cooper's revenue. Its operating margin reached 20 percent for the fiscal year, up from 17 percent in 2001.

Medamicus, CSI's first entry into the growing urinary incontinence segment, performed well in its first full year as a part of the company with its sales more than doubling.

Acquisitions and New Products

During 2002, CSI acquired three companies:

- o In April, the bone densitometry business of Norland Medical Systems, Inc. adding products used in the evaluation of osteoporosis to the CSI portfolio.
- o In May, Ackrad Laboratories, Inc., a developer and manufacturer of disposable medical devices used primarily in the assessment of infertility.

- o In October, Sage BioPharma, a manufacturer of products used in assisted reproductive technology (ART). With just 370 clinics, the infertility market is convenient to serve, and CSI has strong brand awareness with its customers here.

CSI also introduced the Guardian Vaginal Retractor, designed to control the anatomy during vaginal gynecologic procedures. Its unique design meets a long-standing physician need.

Outlook

With the addition of these product lines, CSI expects revenue in 2003 to range from \$83 million to \$86 million with operating margin approaching 25 percent. Over the next several years, CSI expects to complete one or two acquisitions annually and achieve high single-digit to low double-digit growth from existing products.

At December 31, 2002 and 2001, there were 865 and 1,097 common stockholders of record respectively.

Management's Discussion and Analysis of
Financial Condition and Results of Operations

Note numbers refer to the "Notes to Consolidated Financial Statements" beginning on page 46 of this report.

RESULTS OF OPERATIONS

In this section we discuss the results of our operations for fiscal 2002 and compare them with those for fiscal 2001 and 2000. We discuss our cash flows and current financial condition under "Capital Resources and Liquidity."

On November 5, 2002, our Board of Directors authorized a two-for-one stock split in the form of a stock dividend payable November 22, 2002 to stockholders of record on November 14, 2002. As a result, our consolidated financial statements reflect an increase in the number of outstanding shares of our common stock and the transfer of 10 cents per share par value of these additional shares from additional paid-in capital. We have restated all per share amounts to reflect the effect of the stock split.

Highlights: Fiscal Year 2002 vs. Fiscal Year 2001

- o Net sales up 34% to \$315.3 million.
- o Gross profit up 30%; gross margin down by 2 percentage points to 63% of net sales.
- o Operating income up 22% to \$67 million. Operating margin at 21% of net sales down by 2 percentage points.
- o Effective tax rate down to 25% from 29%.
- o Diluted earnings per share up 29% to \$1.57 from \$1.22.

SELECTED STATISTICAL INFORMATION - PERCENTAGE OF NET SALES AND GROWTH

Percent of Sales Years Ended October 31,	2002	% Growth	2001	% Growth	2000
Net sales	100%	34%	100%	17%	100%
Cost of sales	37%	43%	35%	19%	34%
Gross profit	63%	30%	65%	15%	66%
Selling, general and administrative	40%	41%	38%	13%	40%
Research and development	1%	18%	2%	35%	1%
Amortization	1%	(71%)	2%	23%	2%
Operating income	21%	22%	23%	17%	23%

Net Sales

Cooper's two business units, CooperVision ("CVI") and CooperSurgical ("CSI") generate all its revenue:

- o CVI develops, manufactures and markets a broad range of soft contact lenses for the worldwide vision care market.
- o CSI markets medical devices, diagnostic products, surgical instruments and accessories for the gynecology market.

Cooper's consolidated revenue grew by 34% in 2002 and 17% in 2001. Net sales for both CVI and CSI have grown consistently over the three-year period:

Growth (\$ in millions)	2002 vs. 2001		2001 vs. 2000	
-----	-----		-----	
Business Unit				
CVI	\$67.8	38%	\$21.3	14%
	=====	==	=====	==
CSI	\$13.0	22%	\$12.1	26%
	=====	==	=====	==

2002 COMPARED WITH 2001

CVI Revenue

Practitioner and patient preferences in the worldwide contact lens market continue to shift away from conventional lenses that are designed for annual replacement to disposable and frequently replaced lenses. Disposable lenses are designed for either a daily or a two-week replacement cycle; frequently replaced lenses are replaced after one to three months. We refer to the combination of disposable and frequently replaced lenses as "DPR" lenses. An additional transition in the industry involves the shift away from commodity lenses to value added specialty products, such as toric lenses, cosmetic lenses and multifocal lenses.

CVI's revenue growth is driven by unit volume rather than by price. Additionally, our average selling price on a per lens basis is decreasing, reflecting increased sales of DPR lenses, which are marketed in multiple lens packages. This is a global industry trend.

Soft Lens Revenue

CVI's worldwide soft contact lens revenue -- all revenue except royalty revenue, freight reimbursement revenue and miscellaneous items -- grew 44% in fiscal 2002. Revenue from Biocompatibles Eye Care, Inc. ("Biocompatibles"), which we acquired on February 28, 2002, contributed significantly to the growth. Excluding Biocompatibles soft lens revenue of \$55.9 million, however, total soft lens revenue still grew 9%, reflecting our continued global market share gains driven primarily by our specialty products.

Sales in 2001 included \$3.6 million of initial stocking sales to Rohto Pharmaceutical Co., Ltd. ("Rohto"), CVI's marketing partner in Japan. Less than 10% of these sales were repeated in fiscal 2002. Excluding the Rohto stocking sales in 2001, soft lens revenue (excluding Biocompatibles) increased 11%. Soft lens revenue includes sales of both spherical lenses and aspheric and specialty lens products -- toric, cosmetic, multifocal lenses and lenses for patients with dry eyes:

- o Aspheric lenses help improve visual acuity in low light conditions and correct low levels of astigmatism;
- o Toric lenses correct astigmatism;
- o Cosmetic lenses are opaque and color enhancing lenses that alter the natural appearance of the eye;
- o Proclear lenses help enhance tissue-device compatibility for patients experiencing mild discomfort relating to dry eye during lens wear; and
- o Multifocal lenses are designed to correct presbyopia, an age-related vision defect.

CVI reported revenue includes Biocompatibles beginning in March 2002, when we acquired it. To present growth in our total lens business, we have adjusted reported revenue in the following table by adding Biocompatibles revenue for the eight-months ended October 31, 2001. (This data was derived from the unaudited ledgers of Biocompatibles for those periods.) Because we adjusted year-to-date 2001 revenue for eight months, our 2002 revenue does not require any adjustments to be comparable. We think that adjusting the eight-month period is more meaningful because we did not begin to control Biocompatibles' operations until we acquired it. Since our acquisition of Biocompatibles, CVI has emphasized the benefits of Proclear lenses; and in many cases, practitioners are now recommending Proclear lenses in place of older CVI disposable spherical products. Adjusted soft lens revenue grew 10% in 2002.

CVI Revenue

(\$ in millions)	2002	2001	Growth
-----	-----	-----	-----
REPORTED:			
U.S.	\$127.8	\$105.4	21%
International	103.9	55.9	86%
	-----	-----	
Soft lens revenue	231.7	161.3	44%
Miscellaneous revenue	12.2	14.8	(18%)
	-----	-----	
Total reported	\$243.9	\$176.1	38%
	=====	=====	

Adjustments - To include Biocompatibles revenue for comparable periods:

Eight Months Ended October 31, 2001
(In millions)

	2001
-----	-----
U.S.	\$11.2
International	37.3

Soft lens revenue	\$48.5
	=====

(\$ in millions)	2002	2001	Growth
-----	-----	-----	-----
AS ADJUSTED:			
U.S.	\$127.8	\$116.6	10%
International	103.9	93.2	11%
	=====	=====	
Soft lens revenue	231.7	209.8	10%
Miscellaneous revenue	12.2	14.8	(18%)
	-----	-----	
Total as adjusted	\$243.9	\$224.6	9%
	=====	=====	

The 86% growth in reported international soft lens revenue, from \$55.9 million to \$103.9 million, was largely due to international sales of Biocompatibles products of \$41.7 million in the eight months for which Biocompatibles' revenue has been consolidated with our results. Our \$3.6 million initial stocking sales to Rohto in 2001 lowered the adjusted international market percentage growth in the period to 11% from 16%.

Reported soft lens revenue in the United States, up 21%, included \$14.2 million of Biocompatibles revenue. On an adjusted basis, U.S. soft lens revenue grew 10%, due primarily to increased sales in toric, cosmetic and other specialty lenses.

Outlook

We believe that CVI will continue to compete successfully in the worldwide contact lens market, with its DPR toric line, aspheric products and newer specialty products including color lenses (including both those that change and those that accentuate the eye's natural color) and our newly introduced multifocal lenses. Market demographics are favorable, as the teenaged population, the age when most contact lens wear begins, is projected to grow considerably in the United States and European markets over the next two decades.

CVI New Products and Markets

CVI expects to continue to expand its product lines and broaden its geographic presence:

- o Expanded United States distribution of Proclear Compatibles Toric lenses, currently in broad distribution overseas, beginning in January 2003.
- o Enhancement Colors, a new line of disposable cosmetic products that accentuates the natural color of the eye, is scheduled for launch in the United States in February 2003 and in markets outside the U.S. later in the year. These products complement our line of opaque lenses that change the appearance of the color of the eyes.
- o CVI's line of two-week replacement lenses will be launched in Japan in February of 2003 through Rohto, CVI's Japanese marketing partner.
- o The launch of Frequency Multifocal in markets outside the United States is scheduled for the third quarter of fiscal 2003.
- o A global launch of Proclear Aspheric is expected in the third quarter of fiscal 2003. Also, the worldwide introduction of Proclear Multifocal lenses is scheduled for 2004.

CSI Revenue

CSI's revenue grew 22% in fiscal 2002. About 8% of this was generated by internal or organic growth, with the rest from acquisitions completed in the last two fiscal years. Women's healthcare products used primarily by obstetricians and gynecologists account for about 90% of CSI's revenue. The balance represents sales of medical devices outside of women's healthcare where CSI does not actively compete. These sales are excluded when calculating CSI's organic growth. Because CSI's acquisitions have been accounted for as purchases, results of operations of the acquired companies are included in our consolidated results beginning on the date of acquisition. Acquisitions completed in fiscal 2002 or late in fiscal 2001 are discussed below. Acquisitions completed in fiscal 2001 or late in fiscal 2000 are discussed under "2001 Compared with 2000" in the "CSI Revenue" section.

In May 2002, CSI acquired privately held Ackrad Laboratories, Inc. ("Ackrad"), a developer and manufacturer of disposable medical devices used primarily to assess infertility and other gynecologic disorders.

Ackrad's principal product, accounting for about 65 percent of its revenue, is the H/S Elliptosphere Catheter, used in the noninvasive assessment of the female reproductive anatomy, primarily for fertility studies, and also to assess abnormal uterine bleeding and pelvic pain.

In April 2002, CSI acquired the assets of the bone densitometry business of Norland Medical Systems ("Norland"). Norland's densitometry products are used in the evaluation of osteoporosis. CSI had been a distributor of these products since November 2000. The Norland business offers both peripheral and central bone density measurement systems.

In October 2002, CSI acquired Sage BioPharma, Inc., ("Sage") a developer and manufacturer of products used in assisted reproductive therapy.

Demographics

Favorable demographic trends also drive CSI's business. The women of the "baby-boomer" generation are reaching the age when gynecological procedures are performed most frequently; and CSI has, through both acquisition and internal development, built an extensive product line to diagnose and treat these patients.

Outlook

We anticipate that CSI will continue to consolidate the women's healthcare market and complete one or two acquisitions each year, with its revenue reaching an annual run rate of \$100 million by the end of 2003, with operating margins approaching 25%.

2001 COMPARED WITH 2000

CVI Revenue

CVI's worldwide core business, all revenue other than sales to other contact lens suppliers ("OEM" sales), grew 15% in fiscal 2001:

(\$ in millions)	2001	% Total	2000	% Total	% Growth
United States	\$110.9	63%	\$100.8	65%	10%
International	62.3	35%	49.6	32%	25%
Core business	173.2	98%	150.4	97%	15%
OEM	2.9	2%	4.4	3%	(34%)
Total	\$176.1	100%	\$154.8	100%	14%

During 2001, the British pound, the Euro and the Canadian dollar all weakened against the U.S. dollar. In constant currency, our worldwide core business grew 17% and our international core revenue grew 30%. Strong results in Europe, where revenue increased 32%, drove international growth.

DPR Lenses

Worldwide sales of all DPR lenses, both toric and spherical, accounted for 80% of CVI's 2001 revenue. Sales of these products grew 16% in the United States and 21% worldwide.

Toric Lenses

Toric lenses are CVI's largest product line, representing about 45% of its worldwide 2001 revenue. Total sales of toric lenses grew 13% in fiscal 2001. The largest segment of the toric market is DPR torics, where CVI's revenue increased 23% worldwide.

New Products

During 2001, CVI introduced three new specialty lens products:

- o Frequency Multifocal, a multifocal lens designed for monthly replacement, which corrects presbyopia, an age-related vision defect.
- o Ascend, an aspheric lens designed for monthly replacement for patients with near and farsightedness. Ascend lenses are prescribed and billed by the practitioner but shipped directly to the consumer to minimize delivery time while enhancing practice revenue.
- o Frequency 55 Toric XR, designed for monthly replacement by astigmatic patients with complex vision issues.

OEM Business

After the acquisition of Aspect Vision Care in fiscal 1998, we de-emphasized OEM sales, concentrating instead on branded products that generate higher margins. OEM business generated 2% of total CVI revenue in 2001 and declined 34% from the previous year.

CSI Revenue

CSI revenue grew 26% in fiscal 2001. Internal or organic growth generated about 10% of this growth, with the rest from acquisitions completed in the last two fiscal years. Acquisitions completed in fiscal 2001 or late in fiscal 2000 are discussed below.

In August 2001, CSI acquired Medscand Medical AB and Medscand (USA), Inc., collectively "Medscand," which develops, manufactures and markets specimen collection devices used with products that help diagnose cervical cancer. Medscand revenue in 2000 was about \$7 million.

In April 2001, CSI acquired the LuMax System from MedAmicus, Inc. with revenue of about \$4 million in 2000. The LuMax System helps diagnose the cause of female incontinence, the accidental loss of urine resulting in a medical or hygienic problem. It uses patented fiber optic transducer technology to measure and monitor the physiological factors associated with female urinary function.

In October 2000, CSI acquired MedaSonics, Inc., including its line of hand-held and compact Doppler ultrasound systems used in obstetrics and gynecology as well as in cardiology and other medical specialties. The Doppler line of products revenue was about \$4 million in 1999.

Cost of Sales/Gross Profit

Gross Profit % of Net Sales	2002	2001	2000
-----	----	----	----
CVI	67%	69%	70%
	--	--	--
CSI	51%	55%	55%
	--	--	--
Consolidated	63%	65%	66%
	--	--	--

CVI's gross margin decreased 2 percent from fiscal 2001, primarily due to the acquisition of Biocompatibles in February, whose more mature product line generates lower margins. Their newer line, featuring phosphorylcholine technology, is growing and provides margins more in line with CVI's other specialty products. Going forward, we expect that the continuing shift in revenue to phosphorylcholine lenses away from the older line, combined with ongoing manufacturing efficiencies, will result in improved margins.

For fiscal 2003, we anticipate that CVI's gross margins will remain about the same as sales in lower-margin international markets expand, including sales to distributors such as Rohto in Japan, and are offset by increased margins from improved manufacturing efficiencies at both CVI and Biocompatibles.

Because we manufacture a significant amount of our inventory in England, CVI's gross margins tend to decrease when the British pound strengthens against the U.S. dollar and tend to improve when the pound weakens.

CSI's gross margin was 51% of sales in 2002, down from 55% in 2001 and 2000. During the third quarter of 2002, CSI phased out the Cerveillance colposcopy system, which captures and stores digital images of the cervix, and recorded a charge against cost of sales (primarily write down of inventory distribution rights and prepaid royalties) of about \$2 million.

Cerveillance is being phased out because the Leisegang Prism system, with its superior optics, acquired with the purchase of Leisegang Medical Inc. in 2000, is known as the world's finest colposcopy equipment and is favored by customers.

CSI's gross margin from recurring activities (excluding the charge described above) was 54% for fiscal 2002, down from 55% in 2001, primarily because of the lower margins of certain products acquired while CSI executed its strategy to consolidate the women's healthcare market.

For fiscal 2003, we expect that CSI gross margins from recurring activities will not change significantly. We expect that the integration of recent acquisitions, which will tend to increase margins, will be offset by future acquisitions and other alliances that may initially tend to reduce margins.

Selling, General and Administrative Expense ("SGA") (In millions)	2002	2001	2000
-----	-----	-----	-----
CVI	\$ 98.9	\$65.1	\$56.6
CSI	20.3	18.0	16.0
Headquarters	7.5	6.7	6.7
	-----	-----	-----
	\$126.7	\$89.8	\$79.3
	=====	=====	=====

Consolidated SGA increased by 41% in 2002 and 13% in 2001. As a percentage of net sales, consolidated SGA was 40%, 38% and 40% in fiscal 2002, 2001 and 2000, respectively.

CVI's SGA increased 52% in 2002 and 15% in 2001. The increase in 2002 resulted primarily from the acquisition of Biocompatibles, including certain additional costs incurred during the integration period ("integration costs") of about \$1.7 million for fiscal 2002. We expect SGA as a percentage of revenue to improve as Biocompatibles is integrated. In addition, selling, promotion and distribution costs to introduce new products increased in 2002 and 2001. As a percentage of net sales, SGA at CVI was 41% in 2002 and 37% in 2001 and 2000.

At CSI, SGA increased 13% in 2002, significantly below the 22% sales growth. Reported SGA in fiscal 2001 includes about \$800,000 of one-time costs for facility relocation and acquisition integration. Excluding these charges from 2001 SGA, the 2002 increase was 19%, closer to sales growth.

Headquarters' SGA decreased to 2.4% of consolidated revenue from 2.9% in 2001 and 3.3% in 2000. Absent material expenditures resulting from the Sarbanes-Oxley Act and from potential additional regulations from the Securities and Exchange Commission, we anticipate that Headquarters' SGA will continue to grow slower than consolidated revenue.

Research and Development Expense

Research and development expense was 1% of net sales in fiscal 2002, 2% in fiscal 2001 and 1% in 2000: \$4.3 million in 2002, \$3.7 million in 2001 and \$2.7 million in 2000.

In 2002, we initiated development projects for new and improved contact lens products. During the 2003 to 2005 period, CVI plans to invest in two new research programs: the development of an extended wear contact lens and an improved contact lens technology. We expect that research and development expenses will increase by about \$1.5 million to \$2 million in 2003. Most of our R&D expense, other than the two new programs, is for clinical and regulatory and other development activities rather than basic research.

Amortization of Intangibles

Amortization of intangibles was \$1.5 million in 2002, \$5.2 million in 2001 and \$4.2 million in 2000. Amortization expense decreased in fiscal 2002, primarily because following our adoption of Statement of Financial Accounting Standards ("SFAS") 142, we no longer amortize goodwill. Goodwill amortization reduced operating income by \$4.1 million in 2001 and \$3 million in 2000 (see Note 3). The increase in 2001 reflects the effect of acquisition activity during the period.

Operating Income

Operating income grew \$20.1 million or 43% between 2000 and 2002:

Years Ended October 31, (In millions)	2002	2001	2000
-----	-----	-----	-----
CVI	\$60.4	\$51.4	\$47.3
CSI	14.1	10.1	6.3
Headquarters	(7.5)	(6.7)	(6.7)
	-----	-----	-----
	\$67.0	\$54.8	\$46.9
	-----	-----	-----
Percent growth	22%	17%	
	=====	=====	

Settlement of Disputes, Net

In 2000, we recorded a charge to income of \$653,000 to settle a dispute with a German distributor, including the write-off of a related investment in a joint venture.

Other Income, Net

Years Ended October 31, (In thousands)	2002	2001	2000
-----	-----	-----	-----
Interest income	\$ 179	\$ 443	\$ 499
Gain on sale of Quidel stock	1,168	--	--
Gain on Litmus/Quidel transaction	2,075	719	--
Foreign exchange gain (loss)	1,774	34	(256)
Gain on swap contract	--	--	240
Other	(124)	(88)	172
	-----	-----	-----
	\$5,072	\$1,108	\$ 655
	=====	=====	=====

Gain on Sale of Quidel Stock

In fiscal 2002, we sold 592,000 shares of Quidel stock, and realized a gain of approximately \$1.2 million.

Gain on Litmus/Quidel Transaction

In the first quarter of 2001, Quidel Corporation ("Quidel") acquired Litmus Concepts, Inc. ("Litmus") through an exchange of common stock. Cooper held a preferred equity position in Litmus, which equated to approximately a 10 percent ownership. As a result of this transaction, we received 1,138,725 shares of Quidel's common stock, and at that time, we recorded a gain of \$719,000, as the market value of the Quidel shares received exceeded the carrying value of our investment in Litmus. In the third quarter of 2002, we received an additional 334,727 shares of Quidel that were held in escrow and recorded a gain of \$2.1 million, based on the fair market value of Quidel shares on the day we received them.

Foreign Exchange

In conjunction with the closing of our acquisition of Biocompatibles and providing additional capitalization for international operations, we provided about \$21 million in pounds sterling to a U.K. affiliate to settle a short-term financing. While the loans were outstanding, the pound strengthened against the dollar, and a net gain of about \$1.5 million resulted when the loan was repaid. \$300,000 of additional gains resulted from currency exposures that were acquired and not hedged. Our policy continues to be to hedge foreign exchange exposure whenever possible. As such, we do not expect large gains or losses in the future.

Gain on Swap Contract

In 2000, we repaid the Midland Bank loan and cancelled an interest rate swap, realizing a gain of \$240,000.

Interest Expense

Interest expense was \$6.9 million in 2002, \$3.7 million in 2001 and \$4.7 million in fiscal 2000. The increase in 2002 interest expense was driven by higher debt levels needed for acquisitions, partially offset by lower interest rates. The decrease in 2001 generally reflects lower interest rates and reduced average debt in 2001.

Provision for Income Taxes

Our effective tax rate ("ETR") - provision for income taxes as a percent of income before income taxes - for fiscal 2002 was 25%, down from fiscal 2001's ETR of 29%. The reduction of our ETR resulted from a higher percent of our income coming from our international operations (including the international operations of Biocompatibles). Assuming no major acquisitions, we expect our ETR to remain at 25% in fiscal 2003.

With our anticipated faster growth outside the U.S. and a favorable mix of products manufactured outside the U.S., Cooper now expects its U.S. net operating loss carry-forward ("NOLs") in the U.S. to last through 2006.

We implemented a global tax plan in fiscal 1999 to minimize both the taxes reported in our statement of income and the actual taxes we will have to pay once we use all the benefits of our NOLs. The global tax plan consisted of a restructuring of the legal ownership structure for the CooperVision foreign sales and manufacturing subsidiaries.

The stock of those subsidiaries is now owned by a single foreign holding company, which centrally directs much of the activities of those subsidiaries. The foreign holding company has applied for and received the benefits of a reduced tax rate under a special tax regime available in its country of domicile. Assuming no other major acquisitions or large stock issuance, we currently expect that this plan will extend the cash flow benefits of the existing NOLs through 2006, and that actual cash payments of taxes will average less than 5% of pretax profits over this period. After 2006, actual cash payments of taxes are expected to average less than 20% of pretax profits.

CAPITAL RESOURCES & LIQUIDITY

Year 2002 Highlights

- o Operating cash flow \$55.9 million vs. \$25.6 million in 2001.
- o Closed four acquisitions and made contractual payments for prior acquisitions and paid other acquisition costs totaling \$136.1 million.
- o Expenditures for purchases of property, plant and equipment \$23.4 million vs. \$16.8 million in 2001.
- o Increased credit facility with KeyBank from \$75 million to \$225 million, retaining favorable interest rates.

Comparative Statistics:

October 31, (Dollars in millions, except per share amounts)	2002	2001
-----	-----	-----
Cash and cash equivalents	\$ 10.3	\$ 12.9
Total assets	\$ 571.1	\$ 396.8
Working capital	\$ 72.2	\$ 87.2
Total debt	\$ 163.7	\$ 68.8
Stockholders' equity	\$ 311.4	\$ 256.3
Ratio of debt to equity	0.53:1	0.27:1
Debt as a percentage of total capitalization	34%	21%

Operating Cash Flows

Our major source of liquidity continues to be cash flow from operating activities. Operating cash flow for fiscal 2002 was \$55.9 million vs. \$25.6 million in 2001. Cooper continued to improve its receivable collections following difficulties experienced in late 2001 and early 2002 caused by the installation of a new enterprise resource planning system at CVI. These problems resulted in an unusually high level of Days of Sales Outstanding ("DSO's") at the end of 2001 and the first quarter of 2002. At the end of the current year, Cooper's DSO's were 71 days, an improvement of 17% from the 86 days reported at the end of the first quarter. The improved collections resulted in cash outflow being reduced to \$1.4 million this year, vs. \$21 million of cash used in fiscal 2001. Looking forward, we expect that DSO's will remain in the high 60's to low 70's range, although continued international expansion could tend to increase DSO's moderately.

Major uses of cash for operating activities included payments of \$4 million on a previously accrued dispute settlement with Medical Engineering Corporation, \$2.6 million to fund entitlements under Cooper's bonus plans in the first quarter and \$8.8 million in interest payments and payments for costs incurred to obtain our new \$225 million credit facility.

Investing Cash Flows

The cash outflow of \$155.1 million from investing activities was driven by the acquisition of Biocompatibles and other businesses totaling \$136.1 million and capital expenditures of \$23.4 million. The cash outflow was partially offset by \$4.4 million of cash received from the sale of Quidel shares.

Financing Cash Flows

Financing activities provided \$96.3 million of cash, required primarily to fund acquisitions. Most of this cash was provided by our \$225 million line of credit. Also, \$6.1 million was provided by stock option exercises. In addition to debt repayments of \$128.3 million (including net repayments of \$4.2 million of short-term borrowing), we disbursed \$1.5 million for dividends on our common stock.

Risk Management (see Note 7)

We are exposed to changes in foreign currency exchange rates, principally debt denominated in pounds sterling and from overseas operations denominated in foreign currencies. We have hedged most of the debt by entering into contracts to buy sterling forward. We are also exposed to changes in interest rates, as the interest rate on most of our debt varies with the London Interbank Offered Rate ("LIBOR").

Outlook

We believe that cash and cash equivalents on hand of \$10.3 million plus cash from operating activities will fund future operations, capital expenditures, cash dividends and smaller acquisitions. During the year, in order to afford increased flexibility for larger potential transactions, we expanded our credit facilities with KeyBank as agent from \$75 million to \$225 million (see Note 6). Funds will be used, as required, to fund acquisitions and potentially repay debt carrying higher interest rates. At October 31, 2002, we had \$68.5 million available under the KeyBank line of credit.

Inflation and Changing Prices

Inflation has not had any appreciable effect on our operations in the last three years.

New Accounting Pronouncements (See Note 1)

Estimates and Critical Accounting Policies (See Note 1)

Forward-Looking Statements

Some of the information included in this annual report contains "forward-looking statements" as defined by the Private Securities Litigation Reform Act of 1995. The forward-looking statements include certain statements pertaining to our capital resources, performance and results of operations. In addition, all statements regarding anticipated growth in our revenue, anticipated market conditions and results of operations are forward-looking statements. To identify forward-looking statements look for words like "believes," "expects," "may," "will," "should," "seeks," "intends," "plans," "estimates" or "anticipates" and similar words or phrases. Discussions of strategy, plans or intentions often contain forward-looking statements. These, and all forward-looking statements, necessarily depend on assumptions, data or methods that may be incorrect or imprecise.

Events, among others, that could cause actual results and future actions to differ materially from those described by or contemplated in forward-looking statements include major changes in business conditions, a major disruption in the operations of our manufacturing facilities, new competitors or technologies, significant delays in new product introductions, the impact of an undetected virus on our computer systems, acquisition integration delays or costs, increases in interest rates, foreign currency exchange exposure, investments in research and development and other start-up projects, dilution to earnings per share from acquisitions or issuing stock, regulatory issues, changes in tax laws, changes in geographical profit mix effecting tax rates, significant environmental cleanup costs above those already accrued, litigation costs including any related settlements or judgments, cost of business divestitures, the requirement to provide for a significant liability or to write off a significant asset, changes in accounting principles or estimates, and other factors described in our Securities and Exchange Commission filings, including the "Business" section in our Annual Report on Form 10-K for the year ended October 31, 2002. We caution investors that forward-looking statements reflect our analysis only on their stated date. We disclaim any intent to update them except as required by law.

Independent Auditors' Report

The Board of Directors and Stockholders

The Cooper Companies, Inc:

We have audited the accompanying consolidated balance sheets of The Cooper Companies, Inc. and subsidiaries as of October 31, 2002 and 2001, and the related consolidated statements of income, comprehensive income and cash flows for each of the years in the three-year period ended October 31, 2002. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of The Cooper Companies, Inc. and subsidiaries as of October 31, 2002 and 2001, and the results of their operations and their cash flows for each of the years in the three-year period ended October 31, 2002, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the consolidated financial statements, effective November 1, 2001, the Company adopted Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets."

KPMG LLP

San Francisco, California
December 11, 2002

Management's Statement Regarding Financial Reporting

We prepared the financial statements in this annual report according to accounting principles generally accepted in the United States of America, and we are responsible for them. They include estimates based on our informed judgment.

Our accounting systems include controls to reasonably assure the safeguarding of Cooper's assets and the production of financial statements that conform to accounting principles generally accepted in the United States of America. We supplement these by hiring and retaining qualified personnel and by providing for appropriate separation of duties. Other financial information in this report has been derived from the same books and records used to prepare our financial statements and are subject to the same system of financial controls.

The Board of Directors, through its Audit and Finance Committee of three outside directors, determines whether we fulfill our responsibilities to prepare financial statements and maintain financial controls. This committee recommends to the Board of Directors appointment of the Company's independent certified public accountants, subject to ratification by the stockholders. It meets regularly with management and the independent accountants. The independent accountants have access to the committee without management present to discuss auditing and financial reporting. Each committee member is familiar with finance and accounting, and the chair is a financial executive.

KPMG LLP has been the Company's independent certified public accountant since 1980, when the Company incorporated. KPMG provides an objective, independent review of the fairness of reported operating results and financial position.

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies

General

The Cooper Companies, Inc. ("Cooper" or "we" and similar pronouns), through its two business units, develops, manufactures and markets healthcare products. CooperVision ("CVI") markets a range of specialty contact lenses to correct visual defects, including toric lenses to correct astigmatism, cosmetic lenses to change or enhance the appearance of the eyes' natural color, multifocal lenses designed to correct presbyopia, an age-related vision defect, and lenses for patients with dry eyes. Its leading products are disposable and planned replacement toric and spherical lenses. CooperSurgical ("CSI") markets medical devices, diagnostic products and surgical instruments and accessories used primarily by gynecologists and obstetricians.

Estimates and Critical Accounting Policies

Estimates and judgments made by management are an integral part of financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). Actual results may be different from estimated amounts included in our financial statements. We believe that the following critical accounting policies address the significant estimates required of management when preparing our consolidated financial statements in accordance with GAAP:

- o Revenue recognition - In general, we recognize revenue upon shipment of our products, when risk of ownership transfers to our customers. We record, based on historical statistics, appropriate provisions for shipments to customers who have the right of return.
- o Adequacy of allowance for doubtful accounts - In accordance with GAAP, our reported balance of accounts receivable, net of the allowance for doubtful accounts, represents our estimate of the amount that will be realized in cash. We review the adequacy of our allowance for doubtful accounts on an ongoing basis, using historical payment trends and the age of the receivables, complemented by individual knowledge of our customers. If and when our analyses indicate, we increase or decrease our allowance accordingly.
- o Net realizable value of inventory - GAAP states that inventories be stated at the lower of cost or market. On an ongoing basis, we review the carrying value of our inventories, measuring number of months on hand and other indications of salability and reduce the value of inventory if there are indications that the carrying value is greater than market.
- o Valuation of goodwill - We evaluate our goodwill balances and test them for impairment in accordance with the provisions of Statements of Financial Accounting Standards 141, "Business Combinations," and No. 142, "Goodwill and Other Intangible Assets" (see Note 3).
- o Income taxes - As part of the process of preparing our consolidated financial statements, we are required to estimate our income taxes in each of the jurisdictions in which we operate. This process involves estimating our current tax exposures in each jurisdiction including the impact, if any, of additional taxes resulting from tax examinations as well as making judgments regarding the recoverability of deferred tax assets. To the extent recovery of deferred tax assets is not likely based on our estimation of future taxable income in each jurisdiction, a valuation allowance is established. Tax exposures can involve complex issues and may require an extended period to resolve. To determine the quarterly tax rate, we are required to estimate full-year income and the related income tax expense in each jurisdiction. The estimated effective tax rate is adjusted for the tax related to significant unusual items. Changes in the geographic mix or estimated level of annual pre-tax income can affect the overall effective tax rate.

Consolidation

The financial statements in this report include the accounts of all of Cooper's consolidated entities. Intercompany transactions and balances are eliminated in consolidation.

Foreign Currency Translation

Most of our operations outside of the United States have their reporting currency as their functional currency. We translate these assets and liabilities into U.S. dollars at year-end exchange rates. We translate income and expense accounts at weighted average rates for each year. We record gains and losses from the translation of financial statements in foreign currencies into U.S. dollars in other comprehensive income. We record gains and losses from changes in exchange rates on transactions denominated in currencies other than each reporting location's functional currency in net income for each period. Net foreign exchange gain (loss) included in the determination of net income for the years ended October 31, 2002, 2001 and 2000 was \$1.8 million, \$34,000 and (\$256,000), respectively.

Derivatives

We use derivatives to reduce market risks associated with changes in foreign exchange and interest rates. We do not use derivatives for trading or speculative purposes. We believe that the counter party with whom we enter into forward exchange contracts and interest rate swap agreements is financially sound and that the credit risk of these contracts is negligible.

Cash and Cash Equivalents

Cash and cash equivalents include commercial paper and other short-term income producing securities with maturity dates of three months or less. These investments are readily convertible to cash and are carried at cost, which approximates market value.

Inventories, at the Lower of Average Cost or Market

October 31, (In thousands)	2002	2001
-----	-----	-----
Raw materials	\$13,176	\$ 9,889
Work-in-process	14,067	8,491
Finished goods	49,036	32,773
	-----	-----
	\$76,279	\$51,153
	=====	=====

Property, Plant and Equipment, at Cost

October 31, (In thousands)	2002	2001
-----	-----	-----
Land and improvements	\$ 1,545	\$ 1,348
Buildings and improvements	26,418	13,441
Machinery and equipment	122,822	70,533
	-----	-----
	\$150,785	\$85,322
	=====	=====

We compute depreciation using the straight-line method in amounts sufficient to write off depreciable assets over their estimated useful lives. We amortize leasehold improvements over their estimated useful lives or the period of the related lease, whichever is shorter. We depreciate buildings over 35 to 40 years and machinery and equipment over 3 to 15 years.

We expense costs for maintenance and repairs and capitalize major replacements, renewals and betterments. We eliminate the cost and accumulated depreciation of depreciable assets retired or otherwise disposed of from the asset and accumulated depreciation accounts and reflect any gains or losses in operations for the period.

Earnings Per Share ("EPS")

We determine basic EPS by using the weighted average number of shares outstanding and then add outstanding dilutive stock options to determine diluted EPS (see Note 4). On November 5, 2002, our Board of Directors authorized a two-for-one stock split effected in the form of a stock dividend payable November 22, 2002 to stockholders of record on November 14, 2002. As a result, our consolidated financial statements reflect an increase in the number of outstanding shares of our common stock and the transfer of 10 cents per share par value of these additional shares from additional paid-in capital. We have restated per share amounts to reflect the effect of the stock split.

Stock-Based Compensation

We account for stock-based compensation in accordance with Statement of Financial Accounting Standards ("SFAS") 123, "Accounting for Stock-Based Compensation." This statement establishes financial accounting and reporting standards for stock-based compensation, including employee stock option plans. As allowed by SFAS 123, we continue to measure compensation expense under Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations (see Note 9).

New Accounting Pronouncements

We adopted Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" ("SFAS 142"), on November 1, 2001. In accordance with the requirements of SFAS 142, during the six months ended April 30, 2002, we:

- o Evaluated the balance of goodwill and other intangible assets recorded on our consolidated balance sheet as of October 31, 2001. Apart from goodwill, no reclassifications were required to conform to the new criteria for recognition.
- o Reassessed the useful lives and residual values of all acquired intangible assets. No amortization period adjustments were required, and we had no intangible assets (other than goodwill) with indefinite useful lives.
- o Determined that the reporting units to be used to test for goodwill impairment in accordance with SFAS 142 were CVI and CSI.
- o Determined that the fair value of each reporting unit exceeded its carrying value. Accordingly, none of our goodwill was impaired, as of the date of adoption of SFAS 142.

We performed our first annual evaluation of our goodwill effective May 1, 2002, determining that the fair value of each reporting unit continued to exceed its carrying value.

Pro Forma Earnings Per Share ("EPS"):

In accordance with SFAS 142, we no longer amortize goodwill. Actual information for fiscal 2002 and pro forma EPS for fiscal 2001 and 2000 are presented below:

Years Ended October 31, (In thousands, except for earnings per share)	2002	2001	2000
Net income	\$48,875	\$37,136	\$28,968
Add back goodwill amortization*	--	2,962	2,151
Pro forma net income	\$48,875	\$40,098	\$31,119
Pro forma earnings per share:			
Basic	\$ 1.60	\$ 1.35	\$ 1.10
Diluted	\$ 1.57	\$ 1.32	\$ 1.07
Number of shares used to compute earnings per share:			
Basic	30,568	29,673	28,376
Diluted	31,189	30,491	29,019

* Net of tax, assuming an effective tax rate of 27% for 2001 and 28.2% for 2000.

Note 2. Acquisitions

All acquisitions disclosed here have been accounted for as purchases. Accordingly, results of operations for acquired companies are included in our consolidated results of operations from the date of acquisition. All of these acquisitions were made to further the business objectives of both CVI and CSI:

CVI: To continue to grow revenue at one and one-half to two times the rate of the world market and to become the world's largest specialty contact lens provider by mid-decade.

CSI: To identify and acquire selected smaller companies and product lines that can improve its existing market position in women's healthcare or offer opportunities in new clinical areas.

Acquisition of Biocompatibles

On February 28, 2002, Cooper acquired the contact lens business of Biocompatibles International plc. ("Biocompatibles"), comprised of its wholly owned subsidiaries Hydron Limited ("Hydron"), Biocompatibles Eye Care Inc. ("BE Inc.") and Biocompatibles Canada Inc. ("BE Canada"). Under an International Share Sale Agreement (the "Sale Agreement") dated January 15, 2002, among Biocompatibles, Cooper and Cooper's wholly owned subsidiary Aspect Vision Holdings Limited ("AVH"), Biocompatibles sold all of the outstanding shares of Hydron to AVH and all of the outstanding shares of BE Inc. and BE Canada to Cooper.

Biocompatibles had worldwide revenue in calendar 2001 of about \$70 million, about 70% outside of North America. Biocompatibles products are manufactured in Norfolk, Virginia; Farnborough, United Kingdom; Adelaide, Australia and Madrid, Spain.

The aggregate consideration paid for the shares and to repay outstanding indebtedness of the acquired business was 'L'70 million (about \$99 million) plus transaction costs. In the purchase price allocation, \$81.5 million has been ascribed to goodwill, which is not being amortized, and other intangible assets of \$1.1 million being amortized over 8 years. The purchase price allocation also included \$27.7 million of working capital, \$23.3 million of accrued acquisition costs and \$11.7 million of property, plant and equipment. Cooper paid 'L'24 million (about \$34 million) in cash at closing, from its line of credit, and together with AVH issued promissory notes of 'L'44 million (about \$62.2 million) to Biocompatibles, maturing on November 15, 2002 and bearing interest at 5% per annum. The notes could be prepaid at any time at the option of Cooper and AVH without penalty. We negotiated an expanded bank credit facility which was completed May 1, 2002, and used part of the proceeds to repay the notes on May 2, 2002.

The following unaudited pro forma consolidated condensed results of operations for years ended October 31, 2002 and 2001 are presented as if Biocompatibles had been acquired at the beginning of each period presented. The unaudited pro forma information is not indicative of either the results of operations that would have occurred if Biocompatibles had been purchased during the periods presented or of future results of the combined operations. Pro forma net income does not include goodwill amortization expense in any period. We used a 27% effective tax rate for all periods.

Acquisition of Ackrad Laboratories

On May 21, 2002, CSI acquired privately held Ackrad Laboratories, Inc., ("Ackrad") a developer and manufacturer of disposable medical devices used primarily in the assessment of infertility and other gynecologic disorders.

We paid \$12 million at closing for Ackrad. The Ackrad results have been included in our financial statements from the date of acquisition. The purchase price allocation ascribed \$11.5 million to goodwill, \$1.6 million to working capital (including accrued acquisition costs of \$2.4 million), \$442,000 to net property, plant and equipment and \$847,000 to deferred tax assets.

Ackrad's principal product, which accounts for about 65 percent of its revenue, is the H/S Elliptosphere Catheter, used in hysterosalpingography and saline contrast hysterosonography, the noninvasive assessment of the female reproductive anatomy. It is used primarily for fertility studies, and also to assess abnormal uterine bleeding and pelvic pain.

Acquisition of Norland Medical Systems

On April 15, 2002, CSI acquired the assets of the bone densitometry business of Norland Medical Systems ("Norland"). Norland's densitometry products, which are used in the evaluation of osteoporosis, had sales of \$8.5 million (unaudited) in its 2001 fiscal year. CSI plans to maintain operations at the Norland's Fort Atkinson, Wisconsin, facility and will continue to use the Norland brand name. CSI had been a distributor of these products since November 2000.

The Norland business offers both peripheral and central bone density measurement systems.

Cooper paid \$3.5 million at closing, net of \$1.5 million held back against representations and warranties, which expire January 31, 2004, and may pay additional amounts not to exceed a maximum purchase price of \$12 million based on performance over three years. The initial purchase price allocation ascribed \$6.4 million to goodwill, \$2.2 million to working capital (including accrued acquisition costs of \$1.6 million), \$200,000 to net property, plant and equipment and \$600,000 to deferred tax assets.

Acquisition of Medscand Medical

On August 27, 2001, CSI purchased Medscand Medical AB, a Swedish corporation, and Medscand (USA), Inc., an affiliated company (collectively, "Medscand"). Medscand develops, manufactures and markets specimen collection products that are used to help physicians diagnose cervical disease.

Cooper paid \$12 million for Medscand. In the purchase price allocation, \$10.4 million was ascribed to goodwill, which is not being amortized, with other intangible assets of \$450,000 being amortized over 5-7 years. The purchase price allocation included working capital of \$1.5 million, plant, property and equipment of \$0.5 million and net acquisition accrual of \$0.8 million.

Medscand markets its products to clinicians, clinics, hospitals, laboratories and test manufacturers throughout the world. About 85 percent of Medscand's revenue is generated in the United States. Its products are used in the top 25 cancer centers in the United States.

Acquisition of CL Tinters Oy

On May 29, 2001, Cooper's CVI unit completed the acquisition of privately held CL-Tinters Oy ("CLT"), a leading manufacturer of cosmetic contact lenses, who also applies the color tints to CVI's aspheric cosmetic contact lenses. The total acquisition cost was about \$27 million, including \$14 million cash paid at closing, future payments and other costs associated with the acquisition. The purchase price allocation was established at \$1 million for patents, and \$23.2 million for goodwill and was being amortized over 40 years through the end of fiscal 2001. The purchase price allocation included working capital of \$1.6 million; property, plant and equipment of \$2 million and \$0.8 million of other acquisition costs.

Acquisition of LuMax Product Line from MedAmicus

On April 25, 2001, CSI completed the purchase of the LuMax System from MedAmicus, Inc. Cooper paid approximately \$4 million in cash at closing, with \$700,000 due at a later date, for the LuMax System. Of the \$4.7 million purchase price, \$3.6 million has been ascribed to goodwill and was being amortized over 20 years through the end of fiscal 2001.

Gynecologists purchase over 80 percent of LuMax Systems, with revenue split about equally between monitors and disposable catheters.

Acquisition of MedaSonics

On October 18, 2000, CSI acquired MedaSonics, Inc., including its line of handheld and compact Doppler ultrasound systems used in obstetrics and gynecology as well as in cardiology and other medical specialties.

We paid cash of \$500,000 and issued 162,290 shares of our common stock, having a market value of \$5.6 million at the closing. An additional 19,721 shares were paid subsequent to closing, and 7,117 shares were issued on the second anniversary date of the acquisition.

Goodwill has been recorded at \$5.4 million and was being amortized over 20 years through the end of fiscal 2001.

Acquisition of Leisegang

On January 31, 2000, we acquired a group of women's healthcare products (the "Leisegang Business") from NetOptix Corporation for approximately \$10 million in cash at closing, plus in May 2000, an additional \$250,000. Before the acquisition, the Leisegang Business had annual revenue (unaudited) of more than \$11 million from operations in the U.S., Germany and Canada.

The Leisegang Business consists of diagnostic and surgical instruments including colposcopes, instruments to perform loop electrosurgical excision procedures, hand-held gynecological instruments, disposable specula and cryosurgical systems. Many of these products are disposable, including the Sani-Spec line of plastic specula, its largest product group.

Goodwill has been recorded at \$5.4 million and was being amortized over 20 years, through the end of fiscal 2001.

Acquisition of BEI

On December 8, 1999, we acquired a group of women's healthcare products from BEI Medical Systems Company, Inc., including uterine manipulators and other products for the gynecological surgery market, for approximately \$10.3 million in cash. Most of these products are disposable. Physicians use them in both their offices and in hospitals.

Goodwill has been recorded at \$8.4 million and was being amortized over 20 years through the end of fiscal 2001.

Accrued Acquisition Costs

In conjunction with recording acquisitions, we accrue for the estimated costs of severance, legal, consulting, due diligence, plant/office closure and deferred acquisition payments. The chart below shows the balance at October 31, 2001 and activity recorded in 2002.

53 - The Cooper Companies, Inc. and Subsidiaries

Description	Balance 10/31/2001	Additions	Payments	Other	Balance 10/31/2002
Severance	\$ 200	\$12,305	\$ (3,540)	\$ --	\$ 8,965

Net deferred tax assets	\$44,587	\$48,554
	=====	=====

57 - The Cooper Companies, Inc. and Subsidiaries

Cooper has provided a valuation allowance on those deferred tax assets that it believes will not more likely than not be realized. The net decrease in the total valuation allowance for the years ended October 31, 2002, 2001 and 2000 was \$745,000, \$948,000 and \$1.5 million, respectively.

The Company has not provided federal income tax on approximately \$56.7 million of undistributed earnings of its foreign subsidiaries since the Company intends to reinvest this amount outside the U.S. indefinitely.

At October 31, 2002, Cooper had net operating loss and tax credit carryforwards for federal tax purposes that expire as follows:

Year of Expiration ----- (In thousands)	Net Operating Losses	Tax Credits -----
2002	\$ 1,066	\$ 29
2003	1,187	330
2004	83	--
2005	47	--
2006	14,540	--
2007	22,058	--
2008	49,535	--

	=====	=====

Our long-term debt matures as follows over the next five years:

(In thousands)	Long-Term Debt
2003	\$33,814
2004	\$21,000
2005	\$77,369
2006	\$19,105
2007	\$ 9,575

KeyBank Line of Credit

On May 1, 2002, Cooper obtained a \$225 million syndicated bank credit facility. The facility consists of a \$75 million five-year term loan with an interest only payment in the first year then fully amortized in the next four years, and a \$150 million three-year revolving credit facility. KeyBank is the agent for the eleven-bank syndication.

At closing, Cooper paid off \$62 million under its existing line of credit and \$44 million (\$62.2 million) in notes owed to Biocompatibles International plc as a result of Cooper's purchase of Biocompatibles Eye Care, Inc., completed on February 28, 2002. \$21 million of the revolving credit facility was reserved to retire loans due in December 2002 to note holders of Aspect Vision Care, Ltd., a contact lens business that the Company purchased in December 1997 ("Promissory notes - Aspect"). This restriction was removed when we repaid the Aspect Note Holders in December 2002. Cooper plans to use the facility for general corporate purposes, capital expenditures and acquisitions.

Interest rates under the new facility are based on the London Interbank Offered Rate ("LIBOR") plus additional basis points determined by Cooper's ratio of debt to its earnings before interest, taxes, depreciation and amortization (EBITDA.) These range from 125 to 225 basis points for the term loan and from 100 to 200 basis points for the revolver. As of October 31, 2002 and January 1, 2003, the additional basis points were 200 and 175, respectively, on the term loan and 175 and 150, respectively, on the revolver. At the Company's option, it can choose to pay a base rate that is within a range above the prime rate.

The credit agreement:

- o Limits Cooper's debt to a maximum of 50% of its total capitalization, which is defined as the sum of total debt plus stockholders' equity.
- o Limits cash dividends on our common stock to \$1.25 million per fiscal quarter.
- o Requires that the ratio of EBITDA to fixed charges (as defined in the agreement) to be at least 1.3 to 1.
- o Requires that the ratio of total debt to pro forma EBITDA (as defined) be no higher than 2.75 to 1 through January 30, 2003 and 2.5 to 1 thereafter.

At October 31, 2002, Cooper's debt was 34% of total capitalization, its ratio of EBITDA to fixed charges (as defined) was 2.0 to 1 and its ratio of debt to pro forma EBITDA was 1.88 to 1.

The \$3 million cost of acquiring the new credit facility is carried in other assets and amortized to interest expense over its life.

At October 31, 2002, we had \$68.5 million available under the KeyBank line of credit.

(In millions)

Amount of line	\$ 225.0
Reserved for Aspect promissory notes*	(21.0)
Outstanding loans**	(135.5)
Available	\$ 68.5

* Revolver funds were used to repay and restriction removed in December 2002.

** Includes \$3.2 million in letters of credit backing other debt.

Aspect Promissory Notes

In 1997, we acquired Aspect Vision Care Ltd., and issued 'L'14.2 million of promissory notes to the selling stockholders. The promissory notes bear interest of 8% and were repaid December 2, 2002.

Aspect Bank Loans

These loans were paid off in the third quarter 2002 using our new line of credit. The interest rates ranged between 4% and 4.6% for the period the loans were outstanding.

Capitalized Leases

The obligation under capitalized leases at October 31, 2002, was \$4.5 million. The leases primarily relate to manufacturing equipment in the U.S. and the United Kingdom and are secured by those assets. They carry interest rates from 7% to 9% and mature between 2002 and 2007.

COMIDA Bond

The COMIDA bond is a \$3 million Industrial Revenue Bond ("IRB") to finance the cost of plant expansion, building improvements and the purchase of equipment related to CVI's Scottsville, New York, facility. The interest rate has been effectively fixed at 4.88% through a rate swap transaction (see Note 7). Principal is repaid quarterly, from July 1997 to October 2012. The IRB is secured by substantially all of CVI's rights to the facility.

KeyBank issued a letter of credit to support certain obligations under the COMIDA bond. CVI is obligated to repay KeyBank for draws under and expenses incurred in connection with the letter of credit, under a reimbursement agreement, which Cooper guarantees. The agreement contains customary provisions and covenants, including certain required ratios and levels of net worth. CVI and COMIDA have granted a mortgage lien on the building and real estate located in Scottsville and a first lien security interest on the equipment purchased under the bond proceeds to KeyBank to secure payment under the reimbursement agreement.

Note 7. Financial Instruments

The fair values of our financial instruments, including cash and cash equivalents, trade receivables, lines of credit and accounts payable, approximated their carrying values as of October 31, 2002 and 2001 because of the short maturity of these instruments. We believe that there are no significant concentrations of credit risk in trade receivables.

Marketable securities represent the fair value of Quidel Corporation common stock available for sale at each year-end. We received the Quidel shares as a result of a transaction involving Litmus Concepts, Inc., in the first quarter of 2001 and 334,727 shares in the third quarter 2002. We have sold shares of Quidel stock from time to time.

The fair value of our other long-term debt approximated the carrying value at October 31, 2002 and 2001 because we believe that we could obtain similar financing with similar terms.

Derivatives

Foreign Exchange Instruments

Cooper enters into forward exchange contracts to hedge the currency exposure of liabilities and firm commitments denominated in foreign currencies. As of October 31, 2002, we had outstanding forward exchange contracts of \$24.2 million to purchase 'L'14.4 million, which were purchased in November 2002. We obtained the fair value of the forward exchange contracts through KeyBank's foreign exchange department. The fair value indicated that termination of the forward exchange contracts at October 31, 2002 would have resulted in a loss of \$1.8 million. A liability has been accrued for this amount primarily in other liabilities. As these contracts qualify as effective hedges, changes in fair value during 2002 of \$371,000 have been recorded as a component of other comprehensive income ("OCI").

We also enter into forward exchange contracts to minimize the net currency exposure of intercompany liabilities and commitments denominated in foreign currencies. We record gains and losses on these forward contracts in our results, and they offset the gains and losses from the remeasurement of our intercompany accounts. At October 31, 2002, we had outstanding forward exchange contracts against our intercompany accounts of \$4.6 million to sell \$7.4 million Canadian dollars. We obtained the fair value of the forward exchange contracts through KeyBank's Foreign Exchange department. The fair value indicated that termination of these forward exchange contracts at October 31, 2002 would have resulted in a loss of \$30,000. As these contracts qualify as effective hedges, the changes in fair value during 2002 of \$54,000 have been recorded as a component of OCI.

Interest Rate and Other Derivative Instruments

On a selective basis, Cooper enters into interest rate swap agreements to reduce the potential negative impact of increases in interest rates on our outstanding variable-rate debt under the National Westminster Bank and the IRB. We recognize in our results of operations over the life of the contract, as interest expense, the amortization of contract premiums incurred from buying interest rate swaps. We record net payments or receipts resulting from these agreements as adjustments to interest expense. The effect of interest rate instruments on our results of operations in fiscal years ended October 31, 2002, 2001 and 2000 was not significant. As of October 31, 2002, we had interest rate swap agreements with notional amounts totaling \$1.9 million that matures on January 1, 2012 and 'L'2.5 million that matures on April 1, 2003.

We obtained the fair value of the swap agreements through KeyBank's derivative department. The fair value indicated that termination of the swap agreements at October 31, 2002 would have resulted in a \$232,000 loss. A liability for this amount has been accrued in other noncurrent liabilities. As these swap agreements qualify as effective hedges, changes in fair value during 2002 of \$91,000 have been recorded as a component of OCI.

Cash Dividends

On an adjusted per share basis, Cooper paid quarterly dividends of 1 cent per share beginning July 5, 1999 through January 5, 2001. In the first quarter of fiscal 2001, Cooper increased its dividend and paid semiannual dividends of 2.5 cents per share beginning July 5, 2001. In November 2002, Cooper's Board of Directors increased our annual dividend rate from 5 cents per share to 6 cents per share, see Note 13, Subsequent Events, regarding cash dividend declared.

Treasury Stock

(In thousands)	Shares	Purchase Price
-----	-----	-----
Balance at October 31, 1999	917	14,060
Reissued in fiscal 2000(3)	(188)	(2,882)
Reissued in fiscal 2001(2)	(64)	(977)
Reissued in fiscal 2002(1)	(7)	(109)
	-----	-----
	658	\$10,092
	=====	=====

(1) Issued 7,117 treasury shares related to the MedaSonics acquisition.

Treasury stock was credited for \$109,000 and charged to the acquisition accrual upon issuance of the treasury stock.

(2) Cooper issued 63,721 shares of treasury stock:

- 1) 19,721 treasury shares related to the MedaSonics acquisition.
- 2) 44,000 treasury shares upon the exercise of stock options.

Treasury stock was credited for \$977,000 for the average cost of the treasury stock, and \$32,000 was charged to additional paid in capital.

(3) Cooper issued 187,876 shares of treasury stock:

- 1) 24,586 treasury shares related to a prior acquisition.
- 2) 162,290 treasury shares related to the MedaSonics acquisition.
- 3) 1,000 treasury shares upon the exercise of stock options.

Treasury stock was credited for \$2.9 million for the average cost of the treasury stock, crediting \$3.3 million to additional paid in capital, receiving \$14,000 in cash, and charging \$2.5 million to intangibles for the acquisition.

Stockholders' Rights Plan

Under our stockholder rights plan, each outstanding share of our common stock carries one-half of one preferred share purchase right (a "Right"). The Rights will become exercisable only under certain circumstances involving acquisition of beneficial ownership of 20% or more of the our common stock by a person or group (an "Acquiring Person") without the prior consent of Cooper's Board of Directors. If a person or group becomes an Acquiring Person, each Right would then entitle the holder (other than an Acquiring Person) to purchase, for the then purchase price of the Right (currently \$145, subject to adjustment), shares of Cooper's common stock, or shares of common stock of any person into which we are thereafter merged or to which 50% or more of our assets or earning power is sold, with a market value of twice the purchase price. The Rights will expire in October 2007 unless earlier exercised or redeemed. The Board of Directors may redeem the Rights for \$.01 per Right prior to any person or group becoming an Acquiring Person.

Note 9. Employee Stock Plans

At October 31, 2002, Cooper had two stock-based compensation plans:

2001 Long-Term Incentive Plans ("2001 LTIP")

We designed the 2001 LTIP to increase Cooper's stockholder value by attracting, retaining and motivating key employees and consultants who directly influence our profitability. Stockholders approved the 2001 LTIP in March 2001.

The 2001 LTIP authorized either a committee of three or more individuals not eligible to participate in the 2001 LTIP or Cooper's Board of Directors to grant to eligible individuals during a three-year period, stock options, stock appreciation rights, restricted stock, deferred stock, stock purchase rights, phantom stock units and long-term performance awards for up to 1 million shares of common stock, subject to adjustment for future stock splits, stock dividends, expirations, forfeitures and similar events. Options generally vest based on Cooper's stock price, however, in some cases, both stock price and time are the criteria. As of October 31, 2002, 101,000 shares remained available under the 2001 LTIP for future grants. No restricted shares have been granted under the 2001 LTIP. Approximately 6 million shares of restricted stock and stock options were granted under a predecessor plan.

1996 Long-Term Incentive Plan for Non-Employee Directors ("1996 NEDRSP")

The 1996 NEDRSP provides for annual grants of restricted stock and options to non-employee directors on November 15 of each fiscal year. Specifically, each non-employee director will be awarded the right to purchase restricted stock worth \$7,500 (or \$9,375 in the case of a Vice Chairman and Lead Director of the Board who is a non-employee director) for \$0.10 per share by January 15 of the year following the date of the grant. Grants of restricted stock not exercised by then will expire. The restrictions on the restricted stock will lapse when the stock reaches certain target values or by the fifth anniversary of the date of grants. Each non-employee director will also be awarded options to purchase common stock. In addition, each non-employee director was granted an option to purchase 30,000 shares of Cooper's common stock in fiscal 2002 and 2001 (or, in the case of the Vice Chairman and Lead Director of the Board who was a non-employee director, 32,500 shares). In fiscal 2000, each non-employee director was granted an option to purchase 20,000 shares (or, in the case of the Vice Chairman and Lead Director of the Board who was a non-employee director, 22,500 shares). 1,320,000 shares of Cooper's common stock had been reserved for this, of which 800,000 shares are held in the treasury. As of October 31, 2002, 622,330 shares remained available under the 1996 NEDRSP for future grants. Restricted shares of 1,924, 2,688 and 3,550 were granted under the 1996 NEDRSP in fiscal 2002, 2001 and 2000, respectively. There were 182,500 restricted shares with restrictions in place outstanding at October 31, 2002. The weighted-average fair value of restricted stock issued in fiscal 2002 was \$24.38 per share on grant-date. The 1996 NEDRSP was amended October 24, 2001, increasing the shares available for the plan from 520,000 shares to 1,320,000 and extending the expiration date to November 16, 2005. The amendment also increased the options to be granted to each non-employee director from 20,000 shares to 30,000 shares (or, in the case of a non-employee Vice Chairman and Lead Director of the Board, from 22,500 to 32,500).

Common stock activity under these plans was:

Years Ended October 31,	2002		2001		2000	
	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price
Outstanding at beginning of year	2,871,942	\$19.11	3,683,664	\$15.79	3,593,556	\$14.70
Granted	938,500	25.60	679,500	23.66	591,500	16.56
Exercised	(420,666)	14.58	(1,467,222)	12.89	(427,392)	7.20
Forfeited	(11,000)	24.72	(24,000)	19.51	(74,000)	18.24
Outstanding at end of year	3,378,776	\$21.46	2,871,942	\$19.11	3,683,664	\$15.79
Options exercisable at year end	1,588,944	\$17.10	1,792,610	\$15.92	2,444,664	\$13.17
Weighted average fair value of options granted during the year		\$10.56		\$ 8.62		\$ 6.45

The options outstanding at October 31, 2002 for the stock option plans are:

Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding at 10/31/02	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number Outstanding at 10/31/02	Weighted Average Exercise Price
\$ 2.96- 7.25	61,332	3.63	\$ 5.70	61,332	\$ 5.70
\$10.50-15.35	422,444	6.08	13.00	420,444	12.99
\$17.00-20.19	937,500	6.23	17.76	844,500	17.69
\$21.60-22.44	306,000	7.45	21.95	92,668	21.85
\$23.66-26.75	1,515,500	9.04	25.77	170,000	25.92
\$31.11	136,000	5.90	31.11	--	--
\$ 2.96-31.11	3,378,776	7.52	\$21.46	1,588,944	\$17.10

The excess of market value over \$.10 per share of restricted shares on respective dates of grant is initially recorded as unearned compensation and charged to operations as earned. Restricted shares and other stock compensation charged against operating income for the years ended October 31, 2002, 2001 and 2000 was \$114,000, \$235,000 and \$154,000, respectively.

Pro Forma Information

As permitted by SFAS 123, Cooper applies APB Opinion No. 25 and related interpretations to account for its plans for stock options issued to employees. Accordingly, no compensation cost has been recognized for its employee stock option plans, as options are granted with exercise prices equal to or greater than 100% of the market value of the shares at the grant date. Had compensation cost for our stock-based compensation plans been determined under the fair value method included in SFAS 123, our net income and earnings per share would have been reduced to the pro forma amounts indicated below:

(In thousands, except per share amounts)		2002	2001	2000
-----		-----	-----	-----
Net income	As reported	\$48,875	\$37,136	\$28,968
	Pro forma	\$44,992	\$35,367	\$27,694
		-----	-----	-----
Basic earnings per share	As reported	\$ 1.60	\$ 1.25	\$ 1.02
	Pro forma	\$ 1.47	\$ 1.19	\$ 0.98
		-----	-----	-----
Diluted earnings per share	As reported	\$ 1.57	\$ 1.22	\$ 1.00
	Pro forma	\$ 1.47	\$ 1.18	\$ 0.97
		-----	-----	-----
Effective tax rate used to determine pro forma net income		25%	30%	33%
		-----	-----	-----

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions used for grants in fiscal 2002, 2001 and 2000: dividend yield: 0.417%, 0.229% and 0.249%; expected volatility: 55%, 45% and 45%; expected option lives of 3.5 years for all three years and risk-free interest rates of 3.0%, 3.6% and 5.9%, respectively.

Note 10. Employee Benefits

Cooper's Retirement Income Plan

Cooper's Retirement Income Plan (the "Plan") covers substantially all full-time United States employees. Cooper's contributions are designed to fund normal cost on a current basis and to fund over 30 years the estimated prior service cost of benefit improvements (15 years for annual gains and losses). The unit credit actuarial cost method is used to determine the annual cost. Cooper pays the entire cost of the Plan and funds such costs as they accrue. Virtually all of the assets of the Plan are comprised of participation in equity and fixed income funds.

The following table sets forth the Plan's benefit obligations, fair value of the Plan assets, the funded status of the Plan at October 31 and net periodic pension costs for the three-year period ended October 31, 2002.

66 - The Cooper Companies, Inc. and Subsidiaries

	=====	=====	=====

The measurement date for all periods presented in the above table is August 31.

Cooper's 401(k) Savings Plan

Cooper's 401(k) Savings Plan provides for the deferral of compensation as described in the Internal Revenue Code and is available to substantially all full-time United States employees of Cooper. Employees who participate in the 401(k) Plan may elect to have from 1% to 50% of their pre-tax salary or wages deferred and contributed to the trust established under the Plan. Cooper's contribution on account of participating employees, net of forfeiture credits, was \$623,000, \$576,000 and \$427,000 for the years ended October 31, 2002, 2001 and 2000, respectively.

Cooper's Incentive Payment Plan

Cooper's Incentive Payment Plan is available to officers and other key employees. Participants may, in certain years, receive bonuses based on performance. Total bonuses earned for the years ended October 31, 2002, 2001 and 2000, were approximately \$2.6 million, \$1.8 million and \$1.7 million, respectively.

Note 11. Commitments and Contingencies

Lease Commitments

Total minimum annual rental obligations (net of sublease revenue of approximately \$195,000 per year through March 2005) under noncancelable operating leases (substantially all real property or equipment) in force at October 31, 2002 are payable in subsequent years as follows:

(In thousands)

2003	\$ 7,442

2004	6,093

2005	4,607

2006	3,011

2007	2,788

2008 and thereafter	17,487

	\$41,428
	=====

Aggregate rental expense for both cancelable and noncancelable contracts amounted to \$7.4 million, \$4.6 million and \$5.2 million in 2002, 2001 and 2000, respectively.

MEC

In 1993, we reached agreement with Medical Engineering Corporation ("MEC"), a subsidiary of Bristol-Myers Squibb Company, which limited our contingent liabilities associated with breast implant litigation involving a former division of ours (the "MEC Agreement"). The remaining liability recorded for payments to be made to MEC under the MEC Agreement is due as follows:

December 31,
(In thousands)

2002	\$4,500
2003	3,000

	\$7,500
	=====

All payments are contingent upon our earning net income before taxes in the fiscal year ending on the October 31 before the December 31 dates. The liability was recorded in Cooper's financial statements in fiscal 1997 as loss from sale of discontinued operations, as Management concluded that the maximum payments would be likely. They are reflected on the balance sheet in "Other Accrued Liabilities" for the amount due on December 31, 2002 and in "Other Liabilities" for the amount due December 31, 2003.

Pending Litigation

On April 25, 2001, Dioptics Medical Products, Inc. filed a lawsuit against The Cooper Companies, Inc., CooperVision, Inc. and A. Thomas Bender in the United States District Court Northern District of California, Case No. C01-20356-JW. This lawsuit alleges that CooperVision's CV Encore family of contact lenses infringes Dioptics' ENCORE trademark registration for sunglasses. Dioptics alleges causes of action for trademark infringement, dilution and unfair competition, and seeks damages and injunctive relief. On September 30, 2002, the parties filed cross-motions for summary judgment. The Court partially granted CooperVision's motion and held that Dioptics' dilution claim fails as a matter of law because its ENCORE mark is not famous. The Court denied the parties' motions with respect to the trademark infringement and unfair competition causes of action, and set the matter for trial commencing June 10, 2003. The Company believes that it does not infringe any valid and protectable trademark held by Dioptics, and will vigorously defend the action.

Cooper had been engaged in patent litigation in the United States, the United Kingdom and France with CIBA Vision, a division of Novartis, alleging that CVI's Frequency Colors and Expressions opaque contact lenses infringe certain patents of CIBA Vision.

In October 2002, we reached a settlement of all pending patent infringement litigation with CIBA Vision and its subsidiary Wesley Jessen. CIBA Vision has agreed to license for the term of the patent its color contact lens patents to CooperVision in return for a royalty and a cross-license of some of CooperVision's intellectual property rights related to cosmetic contact lenses. The terms of the settlement allow CooperVision to continue selling its existing cosmetic lens products throughout the world.

Patent License Agreement

On February 13, 2002, we renegotiated the terms of a license agreement between CVI and certain former stockholders of Aspect. The renegotiated agreement calls for a fixed license fee of 'L'21.4 million (about \$31 million) including interest, due in quarterly installments, which escalate 5% annually, over an eight-year term. Previously, payments were based on levels of revenue.

Note 12. Business Segment Information

Cooper is organized by product line for management reporting with operating income, as presented in our financial reports, as the primary measure of segment profitability. No costs from corporate functions are allocated to the segments' operating income. Items below operating income are not considered when measuring the profitability of a segment. The accounting policies used to generate segment results are the same as our overall accounting policies.

Two business segments comprise Cooper's operations:

- o CVI, which develops, manufactures and markets a broad range of contact lenses for the world wide vision care market, and
- o CSI, which markets medical devices, diagnostic products, surgical instruments and accessories for the gynecology market.

Total net sales include sales to customers as reported in our consolidated statements of income and sales between geographic areas that are priced at terms that allow for a reasonable profit for the seller. Operating income (loss) is total net sales less cost of sales, research and development expenses, selling, general and administrative expenses and amortization of intangible assets. Corporate operating loss is principally corporate headquarters expense. Investment income, net; settlement of disputes, net; other income (expense), net and interest expense were not allocated to individual segments. Our business segments do not rely on any one major customer.

Identifiable assets are those used in continuing operations except cash and cash equivalents, which are included as corporate assets.

Note 13. Subsequent Events

Stock Dividend

In November 2002, our Board of Directors declared a two-for-one stock split effected in the form of a stock dividend payable November 22, 2002 to stockholders of record on November 14, 2002. All per share amounts in this report reflect the stock split.

Cash Dividend Declared

On December 5, 2002, Cooper declared a semi-annual dividend of 3 cents per split-adjusted share, payable on January 6, 2003 to stockholders of record on December 16, 2002.

Acquisition Payment

In December 2002, Cooper made the final payment to the Aspect Note Holders of about \$23 million, which released the \$21 million previously reserved under our KeyBank Revolver credit agreement
